SUBJECT: National Assessment of Educational Progress (NAEP) Survey Assessments Innovations Lab (SAIL) Pretesting Activities: Virtual World for English Language Arts Assessment – Updated [Revision to a previously approved package (1850-0803 v.106)]

The SAIL Pretesting Activities: Virtual Worlds for English Language Arts Assessment was approved on July 17, 2014 (OMB #1850-0803, v. 106). After completing the playtesting phase of pretesting it has been determined that extended time is needed for the cognitive interview sessions to allow enough time for the think aloud process to take place.

Originally the cognitive interviews were intended to be completed during a 90 minute session. The revised plan increases the cognitive interview session time to 120 minutes. The additional 30 minutes of testing time with student cognitive interview participants is being requested to allow additional time to implement the think-aloud methodology during the cognitive interview sessions (i.e., time for training students on the method and additional time to complete the task while intermittently thinking aloud). In playtesting sessions (without the think aloud method), students have spent on average 75-80 minutes just completing the task, which led us to estimate that more time will be needed for the cognitive interviews. Given that we are increasing the estimated time to complete a cognitive interview by over 33%, we are also increasing the per student incentive for cognitive interviews from \$25 to \$30 to attract students to participate in a 2 hour session outside of school.

Finally, we are also adjusting the overall schedule for all activities approved for this study to accommodate unanticipated delays in the development of the ELA Virtual World tasks.

Volumes I and II, and Appendices A-F have been revised to reflect these changes. Following are the original and revised burden and cost tables, as well as the revised schedule.
