<p>The International Computer and Information Literacy Study (ICILS) is a computer-based international assessment of eighth-grade students' computer and information literacy (CIL) skills that will provide a comparison of U.S. student performance and technology access and use with those of their international peers. ICILS is coordinated by the International Association for the Evaluation of Educational Achievement (IEA), an international collective of research organizations and government agencies that creates the assessment framework, assessment, and background questionnaires and provides procedures and technical standards which all countries must follow. In the U.S., the National Center for Education Statistics (NCES) conducts ICILS. In preparation for the ICILS 2018 main study, in 2017, NCES will conduct a field test to evaluate new assessment items and background questions, to ensure practices that promote low exclusion rates, and to ensure that classroom and student sampling procedures proposed for the main study are successful. The U.S. ICILS main study will be conducted from February through May 2018. The request for the field test and the main study recruitment activities and the field test data collection was approved in August 2016 (OMB# 1850-0929 v.1), with the final versions of the field test questionnaires approved through a change request in December 2016 (OMB# 1850-0929 v.2), and a main study sample size increase approved in February 2017 (OMB# 1850-0929 v.3). This request is to: 1) change the field test data collection timeline, 2) update the confidentiality pledge cited as part of ICILS to account for the Cybersecurity Enhancement Act of 2015, and 3) cite additional data security and confidentiality requirements.</p>
