To start a new Form 477 submission, first use the drop-down lists to specify "Data as of" and "State". Next, use the "Operations" option buttons that will appear to specify "ILEC" (Incumbent Local Exchange Carrier) or "Non-ILEC", and then click "Create New." Filers must report data for different states in separate submissions. Filers must report data for ILEC and non-ILEC operations in separate submissions.

Form 477 Submission for FRN: 16115693, Company: Test2, State: HI, Operations: ILEC, Data as of Dec 31, 2009

Part I.A: Broadband - Asymmetric xDSL

In Part I.A, report connections (wired "lines") to end users that you (including affiliates) equipped to enable the end user to receive information from and/or send information to the Internet at information transfer rates exceeding 200 kbps in at least one direction. Report only in-service connections. The end user's Internet access service may be provided by you (including affiliates) or by an unaffiliated entity. For purposes of Part I.A, Internet Service Providers (ISPs) are not end users. Categorize the connection based on the technology employed by the part of the connection that terminates at the end user location. (Do not report anywhere in Form 477 any high-capacity connections between two locations of the same end user customer, ISP or communications carrier.)

(1)	(2)	(3)	(4)	(5)
<p>Total connections to end users that you (including affiliates) equipped as broadband over your own local loop facilities or the equivalent, or over UNE loops or other facilities you obtained from an unaffiliated entity. Do not convert lines into a voice-grade-equivalent measure.</p>	<p>Percentage of (1) that you (including affiliates) equipped over your own local loop facilities or the equivalent. (Enter 0 if the true value is 0 percent.)</p>	<p>Percentage of (1) that are billed (or incorporated in a service billed) to end users by you, or your affiliates or agents. (Enter 0 if the true value is 0 percent.)</p>	<p>Percentage of (1) that connect to residential end users. (Enter 0 if the true value is 0 percent.)</p>	<p>Percentage of (1) that connect to residential end users and have information transfer rates exceeding 200 kbps in both directions. (Enter 0 if the true value is 0 percent.)</p>

Break down the total connections reported in (1) to show the non-zero number in each of the following speed tiers. If the number of connections in a particular speed tier is zero, leave that data cell blank.

Connections reported in **EACH** data cell below must equal the sum of Asymmetric xDSL connections reported in Part VI by Census Tract, for that download/upload combination, and the sum of **ALL** data cells below must equal the total connections reported in (1).

	Download information transfer rate to the end user (8 categories):								
	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	
Upload information transfer rate from the end user (9 categories):	Greater than 200 kbps and less than 768 kbps	Greater than or equal to 768 kbps and less than 1.5 mbps	Greater than or equal to 1.5 mbps and less than 3 mbps	Greater than or equal to 3 mbps and less than 6 mbps	Greater than or equal to 6 mbps and less than 10 mbps	Greater than or equal to 10 mbps and less than 25 mbps	Greater than or equal to 25 mbps and less than 100 mbps	Greater than or equal to 100 mbps	

Less than or equal to 200 kbps

Greater than 200 kbps and less than
768 kbps

Greater than or equal to 768 kbps and
less than 1.5 mbps

Greater than or equal to 1.5 mbps

Part I.A: Broadband - Terrestrial Fixed Wireless

In Part I.A, report connections (wireless "channels") to end users that you (including affiliates) equipped to enable the end user to receive information from and/or send information to the Internet at information transfer rates exceeding 200 kbps in at least one direction. Report only in-service connections. The end user's Internet access service may be provided by you (including affiliates) or by an unaffiliated entity. Categorize the connection based on the technology employed by the part of the connection that terminates at the end user location. (Do not report anywhere in Form 477 any high-capacity connections between two locations of the same end user customer, ISP or communications carrier.)

Notes specific to Terrestrial Fixed Wireless: (1) Those entities that use unlicensed devices to provide broadband Internet access connections to dispersed, fixed end user premises locations must report those subscribers in this category. By contrast, entities that use unlicensed devices to provide a commercial broadband Internet access service that can be received at any location within a service footprint must report those subscribers in the Terrestrial Mobile Wireless category. (2) For purposes of question (2), connections provided by unlicensed devices are "equipped over your own local loop facilities or the equivalent." (3) Do not report "Wi-Fi" and other wireless Ethernet, or wireless local area network, applications that only enable local distribution and sharing of a premises broadband facility.

Form 477 Submission for FRN: 16115693, Company: Test2, State: HI, Operations: ILEC, Data as of Dec 31, 2009

Part I.A: Broadband - Terrestrial Mobile Wireless

In Part I.A, report the number of subscribers whose device and subscription permit them to access the lawful Internet content of their choice at information transfer rates exceeding 200 kbps in at least one direction. For purposes of Part I.A, providers must exclude subscribers whose choice of content is restricted to only customized-for-mobile content, and exclude subscribers whose subscription does not include, either in a bundle or as a feature added to a voice subscription, a data plan providing the ability to transfer, on a monthly basis, either a specified or an unlimited amount of data to and from Internet sites of the subscriber's choice.

Notes specific to Terrestrial Mobile Wireless: (1) Entities that use unlicensed devices to provide commercial broadband Internet access service that can be received at any location within a service footprint must report their subscribers in this category. By contrast, entities that use unlicensed devices to provide broadband Internet access connections to dispersed, fixed end user premises locations must report those subscribers in the Terrestrial Fixed Wireless category. (2) Do not report "Wi-Fi" and other wireless Ethernet, or wireless local area network, applications that only enable local distribution and sharing of a premises broadband facility.

(1)	(2)	(3)	(4)	(5)

Break down the total subscribers reported in (1) to show the non-zero number in each of the following speed tiers. If the number of subscribers in a particular speed tier is zero, leave that data cell blank. For each speed tier with a non-zero number of subscribers, also report the percentage of subscribers that are "residential" in the specific sense that their subscriptions **are not** billed to a corporate, non-corporate business, government or institutional customer account.

Complete Part I.B for xDSL (asymmetric or symmetric) ONLY IF you are an ILEC (or an affiliate of an ILEC) that was required to complete Part I.A for Asymmetric xDSL and/or Part I.A for Symmetric xDSL.

For the purposes of completing Part I.B for xDSL (asymmetric or symmetric):

(1) "Residential end user premises" include residential living units, individual living units in such institutional settings as college dormitories and nursing homes, and other end user locations to which you (including affiliates and agents) market services that are primarily designed for residential use.

(2) The "service area" of an ILEC consists of those residential end user premises to which the ILEC can deliver telephone service over local loop facilities (or the fixed-wireless last mile equivalent) that it owns.

I.B. Report your best estimate of the percentage of residential end user premises in your service area, in this state, to which your DSL connections (with information transfer rates exceeding 200 kbps in at least one direction) could be provided using installed distribution facilities. Providers of xDSL connections should base responses on the service area of the affiliated ILECs.

(a) Estimated % of residential end user premises

THIS IS THE END OF PART I.B for xDSL (asymmetric and symmetric).

Part I.B: Broadband - Cable Modem

Complete Part I.B for Cable Modem ONLY IF you are a cable system (or an affiliate of a cable system) that is required to complete Part I.A for Cable Modem.

For the purposes of completing Part I.B for Cable Modem:

(1) "Residential end user premises" include residential living units, individual living units in such institutional settings as college dormitories and nursing homes, and other end user locations to which you (including affiliates and agents) market services that are primarily designed for residential use.

(2) The "service area" of a cable system consists of those residential end user premises to which the system can deliver cable television service over cable plant that it owns.

I.B. Report your best estimate of the percentage of residential end user premises in your service area, in this state, to which your Cable Modem connections (with information transfer rates exceeding 200 kbps in at least one direction) could be provided using installed distribution facilities. Providers of Cable Modem connections should base responses on the service area of the affiliated cable systems. (a) Estimated % of residential end user premises

THIS IS THE END OF Part I.B for Cable Modem.

Part I.B: Broadband - Terrestrial Mobile Wireless

Complete Part I.B for Terrestrial Mobile Wireless ONLY IF you (including affiliates) are required to complete Part I.A for Terrestrial Mobile Wireless.

Report the number of business and residential subscribers whose mobile devices are capable of sending or receiving data at information transfer rates exceeding 200 kbps in at least one direction.

(a) Subscribers with devices capable of sending or receiving data at information transfer rates exceeding 200 kbps in at least one direction

I.B. Number of subscribers.

THIS IS THE END OF Part I.B for Terrestrial Mobile Wireless.

Part II.B: Interconnected VoIP Service

If you report end user subscriptions in (1) and/or (2), you must also complete Part V of Form 477.

Reporting by State: Subscriptions reported in (1) must be reported in the state of the subscriber's "Registered Location" as of the data-collection date. (This is the most recent information obtained by an interconnected VoIP service provider that identifies the physical location of the end user. See 47 C.F.R. • 9.3.) Subscriptions reported in (2) must be reported in the same state as the broadband connection purchased in conjunction with the VoIP service.

Reporting subscriptions in (1) and (2): Count one subscription for each end user (retail customer) who subscribes to this service. If the customer pays for the ability to make multiple simultaneous calls from a single location, then count the maximum number of calls that can be active at one time. In general, VoIP service to a business retail customer will be counted as more than one subscription.

Reporting wholesale customers in (3): Count the number of companies who purchase your VoIP components or service and resell them, as part of their own VoIP service, to end users or other wholesalers in this state.

	(1) VoIP subscriptions that end users purchased from you without also purchasing a broadband connection from you	(2) VoIP subscriptions that end users purchased from you in conjunction with the purchase of a broadband connection	(3) Wholesale customers who purchased your VoIP service to resell as their own VoIP service
(a) Total number.

Part III: Mobile Local Telephone

In Part III, report cellular, PCS, and other mobile voice telephony subscribers in the state that you served over your own facilities. Include directly billed subscribers, pre-paid subscribers, and subscribers served via resellers. Count a subscriber as a mobile handset, car-phone, or other revenue-generating active voice unit that has a unique phone number and that can place and receive calls from the public switched telephone network. Subscriber counts by state should be based on the area codes of the phone numbers provided to subscribers.

OMB NO: 3060-0816

Form 477 Submission for FRN: 16115677, Company: Test2, State: HI, Operations: ILEC, Data as of Dec 31, 2009

You can submit Form 477 data in one or more upload XML files. To process multiple files, run the upload function for each file. Raw text Census Tract data can be uploaded as a separate file. If Part VI is included, individual upload files should contain not more than 100,000 rows for Part VI detail. If your submission contains more than 100,000 rows for Part VI, please upload the Part VI data in separate files.

Form 477 Data File Upload

XML file:

Part I-V data option: Delete all Part I-V data before inserting XML file contents (Note: Data for all parts will be deleted only if the input XML file is validated against the XML Schema.)

Raw data upload file for Part
VI detail:

Error Messages: On* Off

* The Error Messages option is much slower to process and is not recommended for large data sets.

As the upload function runs, you can monitor the progress in your browser. Leave your browser open and do not open other pages in the browser tab or session as the upload proceeds. This process uses URL redirection; if URL redirection is disabled in your browser settings the process will not complete. The process may take some time for larger data sets.

The upload for Parts I-V works exactly the same as the individual edit pages for Parts I-V. That is to say, if only data for Part I.A (A) Asymmetric xDSL is included in the upload file, then only data for that specific section will be updated in the processing. All other Part data will remain unchanged. This allows for flexibility as to how many input files of what types you wish to use. The data checks for each part are enforced individually as they are on the save for the individual Parts. No Part data with errors will be saved to the database, but any and all parts which do not have errors will be saved. The processing of the Part VI detail is more efficient in the raw data file; therefore it is not recommended that the XML upload be used for more than 5,000 Part VI data rows.

Form 477 Submission for FRN: 16115677, Company: Test2, State: HI, Operations: ILEC, Data as of Dec 31, 2009

Part VI: Broadband by Technology, Address, and Download/Upload Information Transfer Rate Combinations

Your FRN has been authorized to submit address data in lieu of census tract totals.

Type a street number and street name into the first Address line, below, and specify the broadband Technology at that address.

Address / Technology

Please note: The unique identifier for address data is the first line of the address, with either a city / state / zip code combination or latitude / longitude coordinates. In order to enter sites based on specific coordinates for which there are no corresponding addresses, assign each site a unique descriptive name (such as "Site 1", "Site 2", etc.) in the address field.
