

Card Sort example

This is a study preview. No data will be saved.

The screenshot shows the OptimalSort interface. On the left is a vertical list of 15 items: Robocalls, Weight loss products and ads, Mystery shopper scams, Spam, Payday loans, Free credit report, Tech support scams, Mortgage relief, Phishing, Identity theft warning signs, Getting out of debt, Heath products that promise a cure, and Hiring a lawyer. At the bottom left, a progress bar shows '34 of 34 remaining'. In the center, a white modal window titled 'Instructions' contains the following text:

Instructions

Step 1
Take a quick look at the list of items to the left.
We'd like you to sort them into groups that make sense to you.
There is no right or wrong answer. Just do what comes naturally.

Step 2
Drag an item from the left into this area to create your first group.

Step 3
Click the title to rename your new group. You can leave these blank if you'd like.

Step 4
Add more items to this group by dropping them on top of it.
Make more groups by dropping them in unused spaces.
When you're done click "Finished" at the top right. Have fun!

An 'OK' button is located at the bottom right of the modal window. In the top right corner of the interface, there are two buttons: 'Leave a comment' and 'Finished'.

Instructions

Here's how it works:

1. You will be asked to find a certain item and presented with a list of links.
2. Click through the list until you arrive at one that you think helps you complete the task.
3. If you take a wrong turn, you can go back by clicking one of the links above.

This is not a test of your ability, there are no right or wrong answers.

That's it, let's get started!
