PART I.—GENERAL INFORMATION

Background. --This proceeding was instituted in response to a petition filed on March 23, 2017, by National Biodiesel Board Fair Trade Coalition (Washington, DC) and its individual members. Countervailing and/or antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce (“Commerce”) makes an affirmative determination of subsidization and/or dumping. Questionnaires and other information pertinent to this proceeding are available at

https://www.usitc.gov/investigations/701731/2017/biodiesel_argentina_and_indonesia/final.htm

Biodiesel covered by these investigations is a fuel comprised of mono-alkyl esters of long chain fatty acids derived from vegetable oils or animal fats, including biologically-based waste oils or greases, and other biologically-based oil or fat sources. This includes biodiesel in pure form (“B100”) as well as fuel mixtures containing at least 99 percent biodiesel by volume (“B99”). For fuel mixtures containing less than 99 percent biodiesel by volume, only the biodiesel component of the mixture is covered by the scope of the petitions.¹

Biodiesel covered by these investigations is currently imported primarily under subheadings 3826.00.10 and 3826.00.30 of the Harmonized Tariff Schedule of the United States (HTSUS). The HTSUS provisions are for convenience and customs purposes.

Reporting of information. --If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, and/or purchaser questionnaire), you need not respond to duplicated questions.

Confidentiality. --The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. § 1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

Verification. --The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

Release of information. --The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the

¹ Biodiesel is generally produced to American Society for Testing and Materials International (“ASTM”) D6751 specifications, but it can also be made to other specifications. Biodiesel commonly has one of the following Chemical Abstracts Service (“CAS”) numbers, generally depending upon the feedstock used: 67784-80-9 (soybean oil methyl esters); 91051-34-2 (palm oil methyl esters); 91051-32-0 (palm kernel oil methyl esters); 73891-99-3 (rapeseed oil methyl esters); 61788-61-2 (tallow methyl esters); 68990-52-3 (vegetable oil methyl esters); 129828-16-6 (canola oil methyl esters); 67762-26-9 (unsaturated alkylcarboxylic acid methyl ester); or 68937-84-8 (fatty acids, C12-C18, methyl ester).

Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals. In addition, if your firm is a U.S. producer, the information you provide on your production and imports of biodiesel and your responses to the questions in Part I of the producer questionnaire will be provided to the U.S. Department of Commerce, upon its request, for use in connection with (and only in connection with) its requirement pursuant to section 702(c)(4)/732(c)(4) of the Act (19 U.S.C. § 1671a(c)(4)/1673a(c)(4)) to make a determination concerning the extent of industry support for the petition requesting this proceeding. II-8. **Production, shipment, and inventory data**--Report your firm's production capacity, production, shipments, and inventories related to the production of biodiesel in its U.S. establishment(s) during the specified periods.

"Nameplate production capacity" – The level of production that your establishment(s) could achieve based on the rated or intended full-load sustained (24/7, all year round) output of a facility. Changes in nameplate capacity should only reflect new investments or retirement of productive machinery.

"Average production capacity" or "capacity" – The level of production that your establishment(s) could reasonably have expected to attain during the specified periods taking into account normal operating conditions (i.e., using equipment and machinery in place and ready to operate; normal operating levels (hours per week/weeks per year) and time for downtime, maintenance, repair, and cleanup; and a typical or representative product mix). Changes in average production capacity should reflect both new investments, retirement of productive machinery, **and** changes in normal operating conditions.

"Production" – All production in your U.S. establishment(s), including production consumed internally within your firm and production for another firm under a toll agreement.

"Commercial U.S. shipments" –Shipments made within the United States as a result of an arm's length commercial transaction in the ordinary course of business. "Internal consumption" – Product consumed internally by your firm. Such transactions are valued at fair market value (less the value that can be measured by the sale of any separated or re-assigned RINs as those are to be reported separately).

"Transfers to related firms" –Shipments made to related domestic firms. Such transactions are valued at fair market value.

"Related firm" –A firm that your firm solely or jointly owns, manages, or otherwise controls.

"Export shipments" –Shipments to destinations outside the United States, including shipments to related firms.

"Inventories" – Finished goods inventory, not raw materials or work-in-progress.

Note: As requested in Part I of this questionnaire, please keep all supporting documents/records used in the preparation of the trade data, as Commission staff may contact your firm regarding questions on the trade data. The Commission may also request that your company submit copies of the supporting documents/records (such as production and sales schedules, inventory records, etc.) used to compile these data.

¹ Quantities reported in 1,000 gallons should represent the volume attributable to biodiesel. So in the case of a B99 blend, the quantities reported should exclude the non-biodiesel material added to the blend. Internal consumption, to the degree this represents use of biodiesel to create lower level blends (less than B99), should reflect just the biodiesel used in the blending operations.

² Internal consumption and transfers to related firms must be valued at fair market value LESS value made from independent RIN sales. In the event that your firm uses a different basis for valuing these transactions, please specify that basis (e.g., cost, cost plus, etc.) and provide value data using that basis for each of the periods noted above: _____.

³ Identify your firm's principal export markets: _____.

RECONCILIATION OF SHIPMENTS, PRODUCTION, AND INVENTORY.--Generally, the data reported for the end-of-period inventories (i.e., line AD) should be equal to the beginning-of-period inventories (i.e., line C), plus production (i.e., lines, D through J), less total shipments (i.e., lines L, O, Q, T, X, Z, and AB). Please ensure that any differences are not due to data entry errors in completing this form, but rather reflect your firm's actual records; and, also provide explanations for any differences (e.g., theft, loss, damage, record systems issues, etc.) if they exist.

II-12. **Employment data.**--Report your firm's employment-related data related to the production of biodiesel and provide an explanation for any trends in these data.

"Production and Related Workers" (PRWs) includes working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storage, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial and guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Average number employed may be computed by adding the number of employees, both full time and part time, for the 12 pay periods ending closest to the 15th of the month and divide that total by 12.

"Hours worked" includes time paid for sick leave, holidays, and vacation time. Include overtime hours actually worked; do not convert overtime pay to its equivalent in straight time hours.

"Wages paid" --Total wages paid before deductions of any kind (e.g., withholding taxes, old-age and unemployment insurance, group insurance, union dues, bonds, etc.). Include wages paid directly by your firm for overtime, holidays, vacations, and sick leave.

Note.--Please ensure that your firm has removed by-product revenue from its normal classification location in the data reported in question III-10a (next page) so that these by-product revenues which are reported above (and then used automatically as an offset to COGS) do not get double counted in operating and net income.

III-9a. **Independent RIN sales.**—State how your firm typically classifies revenues from the sales of independent RINs in the normal course of business:

- Top line as part of revenue from sales of biodiesel: _____
- In another revenue category (e.g., other income): _____

III-9b. **Federal blenders tax credit (BTC).**—State how your firm typically classifies revenues from the Federal BTC in the normal course of business:

III-10a. **Operations on biodiesel.**--Report the revenue and related cost information requested below on the biodiesel operations of your firm's U.S. establishment(s).¹ Do not report resales of purchased products. Note that internal consumption and transfers to related firms must be valued at fair market value. Input purchases from related suppliers should be consistent with and based on information in the firm's accounting books and records. Provide data for the three most recently completed calendar years. If your firm was involved in tolling operations (either as the toller or as the tollee), please contact Charles Yost at (202) 205-3432 before completing this section of the questionnaire.

III-10b. **Financial data reconciliation.**--The calculable line items from question III-10a (*i.e.*, total net sales quantities and values, total COGS, gross profit (or loss), total SG&A, and net income (or loss)) have been calculated from the data submitted in the other line items. Do the calculated fields return the correct data according to your firm's financial records ignoring non-material differences that may arise due to rounding?

Yes No--If the calculated fields do not show the correct data, please double check the feeder data for data entry errors and revise.

Also, check signs accorded to the post operating income line items; the two expense line items should report positive numbers (*i.e.*, expenses are positive and incomes or reversals are negative--instances of the latter should be rare in those lines) while the income line item also in most instances should have its value be a positive number (*i.e.*, income is positive, expenses or reversals are negative).

If after reviewing and potentially revising the feeder data your firm has provided, the differences between your records and the calculated fields persist please identify and discuss the differences in the space below.

III-11. **Nonrecurring items (charges and gains) included in the subject product financial results.**--For each annual period for which financial results are reported in question III-10a, please specify all material (significant) nonrecurring items (charges and gains) in the schedule below, the specific question III-10a line item where the nonrecurring items are included, a brief description of the relevant nonrecurring items, and the associated values (*in \$1,000*), as reflected in question III-10a; i.e., if an aggregate nonrecurring item has been allocated to question III-10a, only the allocated value amount included in question III-10a should be reported in the schedule below. Note: The Commission's objective here is to gather information only on material (significant) nonrecurring items which impacted the reported financial results of the subject product in question III-10a.

III-13. **Asset values.**--Report the total assets (i.e., both current and long-term assets) associated with the production, warehousing, and sale of biodiesel. If your firm does not maintain some or all of the specific asset information necessary to calculate total assets for biodiesel in the normal course of business, please estimate this information based upon a method (such as production, sales, or costs) that is consistent with relevant cost allocations in question III-10a. Provide data as of the end of the three most recently completed calendar years.

Note: Total assets should reflect net assets after any accumulated depreciation and allowances deducted.

Total assets should be allocated to the subject products if these assets are also related to other products. Please provide a brief explanation if there are any substantial changes in total asset value during the period; e.g., due to asset write-offs, revaluation, and major purchases.

PRICE DATA

IV-2. This question requests quarterly quantity and value data for your firm's commercial shipments to unrelated U.S. customers since January 1, 2014 of the following products produced by your firm.

Product 1.--B100 (pure biodiesel), including RIN value when sold as 1.5 RINs per gallon.

Product 2.--B100 (pure biodiesel), sold without RINs.

Product 3.--B99 (biodiesel blend containing 99.0% - 99.9% biodiesel), including RIN value when sold as 1.5 RINs per gallon.

Product 4.--B99 (biodiesel blend containing 99.0% - 99.9% biodiesel), sold without RINs.

Please note that values should be f.o.b., U.S. point of shipment and should not include U.S.-inland transportation costs. Values should reflect the *final net* amount paid to your firm (i.e., should be net of all deductions for discounts or rebates). Please also report the RIN value and any tax credit received separate from the biofuel value in the following tables. The total value column should reflect the total invoice value, less all discounts, allowances, rebates, prepaid freight, and the value of returned goods.

IV-2 (a). During January 2014-June 2017, did your firm produce and sell to unrelated U.S. customers any of the above listed products (or any products that were competitive with these products)?
