PART I.—GENERAL INFORMATION

Background.--This proceeding was instituted in response to a petition filed on August 8, 2018, by Dexstar Wheel, Elkhart, Indiana. Countervailing and/or antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce (“Commerce”) makes an affirmative determination of subsidization and/or dumping. Questionnaires and other information pertinent to this proceeding are available at https://www.usitc.gov/investigations/701731/2018/steel_trailer_wheels_china/final.htm.

Trailer wheels covered by these investigations are certain on-the-road steel wheels, discs, and rims for tubeless tires with a nominal wheel diameter of 12 inches to 16.5 inches, regardless of width. Certain on-the-road steel wheels with a nominal wheel diameter of 12 inches to 16.5 inches within the scope are generally for road and highway trailers and other towable equipment, including, inter alia, utility trailers, cargo trailers, horse trailers, boat trailers, recreational trailers, and towable mobile homes. The standard widths of certain on-the-road steel wheels are 4 inches, 4.5 inches, 5 inches, 5.5 inches, 6 inches, and 6.5 inches, but all certain on-the-road steel wheels, regardless of width, are covered by the scope.

The scope includes rims and discs for certain on-the-road steel wheels, whether imported as an assembly, unassembled, or separately. The scope includes certain on-the-road steel wheels regardless of steel composition, whether clad or not clad, whether finished or not finished, and whether coated or uncoated. The scope also includes certain on-the-road steel wheels with discs in either a “hub-piloted” or “stud-piloted” mounting configuration, though the stud-piloted configuration is most common in the size range covered.

All on-the-road wheels sold in the United States must meet Standard 110 or 120 of the National Highway Traffic Safety Administration's (NHTSA) Federal Motor Vehicle Safety Standards, which requires a rim marking, such as the “DOT” symbol, indicating compliance with applicable motor vehicle standards. See 49 CFR 571.110 and 571.120. The scope includes certain on-the-road steel wheels imported with or without NHTSA's required markings.

Certain on-the-road steel wheels imported as an assembly with a tire mounted on the wheel and/or with a valve stem or rims imported as an assembly with a tire mounted on the rim and/or with a valve stem are included in the scope of this investigation. However, if the steel wheels or rims are imported as an assembly with a tire mounted on the wheel or rim and/or with a valve stem attached, the tire and/or valve stem is not covered by the scope.

The scope includes rims, discs, and wheels that have been further processed in a third country, including, but not limited to, the painting of wheels from China and the welding and painting of rims and discs from China to form a steel wheel, or any other processing that would not otherwise remove the merchandise from the scope of the investigations if performed in China.

Excluded from this scope are the following:

- (1) Steel wheels for use with tube-type tires; such tires use multi piece rims, which are two-piece and three-piece assemblies and require the use of an inner tube;
- (2) aluminum wheels;
- (3) certain on-the-road steel wheels that are coated entirely with chrome;
- (4) steel wheels that do not meet Standard 110 or 120 of the NHTSA's requirements other than the rim marking requirements found in 49 CFR 571.110S4.4.2 and 571.120S5.2;
- (5) steel wheels that meet the following specifications: steel wheels with a nominal wheel diameter ranging from 15 inches to 16.5 inches, with a rim width of 8 inches or greater, and a wheel backspacing ranging from 3.75 inches to 5.5 inches; and
- (6) steel wheels with wire spokes.

Certain on-the-road steel wheels subject to this investigation are properly classifiable under the following category of the Harmonized Tariff Schedule of the United States (HTSUS): 8716.90.5035 which covers the exact product covered by the scope whether entered as an assembled wheel or in components. Certain on-the-road steel wheels entered with a tire mounted on them may be entered under HTSUS 8716.90.5059 (Trailers and semi-trailers; other vehicles, not mechanically propelled, parts, wheels, other, wheels with other tires) (a category that will be broader than what is covered by the scope). While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the subject merchandise is dispositive.

Non-galvanized wheels.--Trailer wheels that match the scope definition of trailer wheels, but have not been galvanized.

Galvanized wheels.--Trailer wheels that match the scope definition of trailer wheels, and which have been galvanized.

Galvanization is the process of applying a protective zinc coating to the trailer wheel to prevent corrosion.

Reporting of information.--If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, and/or purchaser questionnaire), you need not respond to duplicated questions.

Confidentiality.--The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. § 1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

Verification.--The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

Release of information.--The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals.

D-GRIDS tool.--The Commission has a tool that firms can use to move data from their own MS Excel compilation files into self-contained data tables within this MS Word questionnaire, thereby reducing the amount of cell-by-cell data entry that would be required to complete this form. This tool is a macro-enabled MS Excel file available for download from the Commission's generic questionnaires webpage (https://www.usitc.gov/trade_remedy/question.htm) called the "D-GRIDs tool." Use of this tool to help your firm complete this questionnaire is *optional*. Firms opting to use the D-GRIDs tool to populate their data into this questionnaire will need the D-GRIDs specification sheet PDF file specific to this proceeding (available on the case page which is linked under the "Background" above) which includes the necessary references relating to this questionnaire, as well as the macro-enable MS Excel D-GRIDs tool itself from the generic questionnaires page. More detailed instructions on how to use the D-GRIDs tool are available within the D-GRIDs tool itself.

"Internal consumption" – Product consumed internally by your firm. **If your firm is only adding a tire and/or valve stem to a trailer wheel, do not count such wheels as internally consumed.**

"Transfers to related firms" –Shipments made to related domestic firms.

Products	Internal consumption 2018 (pounds)	Transfers to related firms 2018 (pounds)
Sold as trailer wheels ¹	N/A

¹ For any trailer wheels reported here that are mounted with a tire and/or valve stem, report only the weight of the wheel itself and exclude the portion of the weight of the attached tire and/or valve stem. ² Please identify the top 5 downstream products/uses trailer wheels were processed into by your firm or by your related firm(s) in part "b" of this question. ³ Please describe the final disposition of this merchandise: .		

RECONCILIATION OF INTERNAL CONSUMPTION AND TRANSFERS.—The sum of the data reported above should be equal to the 2018 quantity data reported for internal consumption and transfers in question II-7a for 2018. If the calculated fields below return values other than zero (i.e., "0"), the data reported must be revised prior to submission to the Commission.

Reconciliation	Internal consumption 2018	Transfers to related firms 2018
Quantity data in this question minus data in question II-7a = zero ("0"), if not revise.	0	0

II-11b. **Captive production use: downstream products and share of cost.**-- If the trailer wheels internally consumed by your firm, or transferred to a related firm, were processed into other products (as reported in question II-11a), please identify the top 5 downstream products/uses that trailer wheels were processed into by your firm or by your related firm(s) in the table below, and identify the share of **total cost** of the downstream product accounted for by the trailer wheel.

Downstream product	Share of the total cost of the downstream product accounted for by trailer wheels (percent)

II-12. **Employment data.**--Report your firm's employment-related data related to the production of trailer wheels and provide an explanation for any trends in these data.

"Production and Related Workers" (PRWs) includes working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storage, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial and guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Average number employed may be computed by adding the number of employees, both full time and part time, for the 12 pay periods ending closest to the 15th of the month and divide that total by 12. For the January to March periods, calculate similarly and divide by 3.

"Hours worked" includes time paid for sick leave, holidays, and vacation time. Include overtime hours actually worked; do not convert overtime pay to its equivalent in straight time hours.

"Wages paid" --Total wages paid before deductions of any kind (e.g., withholding taxes, old-age and unemployment insurance, group insurance, union dues, bonds, etc.). Include wages paid directly by your firm for overtime, holidays, vacations, and sick leave.

II-13. **Related firms.**--If your firm reported transfers to related firms in question II-7a, please indicate the nature of the relationship between your firm and the related firms (e.g., joint venture, wholly owned subsidiary), whether the transfers were priced at market value or by a non-market formula, whether your firm retained marketing rights to all transfers, and whether the related firms also processed inputs from sources other than your firm. Please also discuss to what extent other affiliated companies (including common parent companies) participated in determining relevant terms and conditions (e.g., decision-making, pricing factors, etc.) of these transfers.

II-14. **Purchases.**--Has your firm purchased trailer wheels produced in the United States or in other countries since January 1, 2016? (Do not include imports for which your firm was the importer of record. These should be reported in an importer questionnaire).

"Purchase" – A transaction to buy product from a U.S. corporate entity such as another U.S. producer, a U.S. distributor, or a U.S. firm that has directly imported the product.

"Import" –A transaction to buy from a foreign supplier where your firm is the importer of record.

Do the calculated fields return the correct data according to your firm's financial records ignoring non-material differences that may arise due to rounding?

		<p>If no-- If the calculated fields do not show the correct data, please double check the feeder data for data entry errors and revise. Also, check signs accorded to the post operating income line items; the two expense line items should report positive numbers (i.e., expenses are positive and incomes or reversals are negative--instances of the latter should be rare in those lines) while the income line item also in most instances should have its value be a positive number (i.e., income is positive, expenses or reversals are negative). If your firm does not maintain some or all of the specific asset information necessary to calculate total assets for trailer wheels in the normal course of business, please estimate this information based upon a method (such as production, sales, or costs) that is consistent with relevant cost allocations in question III-9a. Provide data as of the end of your firm's three most recently completed fiscal years.

If the calculated fields below return values other than zero (i.e., "0") and both are being reported on a calendar basis, please explain the discrepancy below.*
