PART I.—GENERAL INFORMATION

Background.--This proceeding was instituted in response to a petition filed on August 16, 2017, by Core Pipe Products, Inc., Carol Stream, Illinois and Maass Flange Corporation, Houston, Texas. Antidumping and Countervailing duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce ("Commerce") makes an affirmative determination of dumping and subsidization. Questionnaires and other information pertinent to this proceeding are available at http://www.usitc.gov/investigations/701731/2018/stainless_steel_flanges_china_and_india/final.htm.

Stainless steel flanges covered by these investigations are certain forged stainless steel flanges, whether unfinished, semi-finished, or finished, generally manufactured to the material specification of ASTM/ASME A/SA182, and made in alloys such as, but not limited to, 304, 304L, 316, and 316L (or combinations thereof). The scope includes six general types of flanges. They are: (1) weld neck, used in butt-weld line connection; (2) threaded, used for threaded line connections; (3) slip-on, used to slide over pipe; (4) lap joint, used with stub-ends/butt-weld line connections; (5) socket weld, used to fit pipe into a machine recession; and (6) blind, used to seal off a line. The sizes and descriptions of the flanges within the scope include all pressure classes of ASME B16.5 and range from one-half inch to twenty-four inches nominal pipe size (NPS). Specifically excluded from the scope of these orders are cast stainless steel flanges. Cast stainless steel flanges generally are manufactured to specification ASTM A351.

Unfinished stainless steel flanges possess the approximate shape of finished stainless steel flanges and have not yet been machined to final specification after the initial casting, forging, or like operations. These machining processes may include boring, facing, spot facing, drilling, tapering, threading, beveling, heating, or compressing.

The country of origin for certain forged stainless steel flanges, whether unfinished, semi-finished, or finished is the country where the flange was forged. Subject merchandise includes stainless steel flanges as defined above that have been further processed in a third country, including but not limited to processing such as boring, facing, spot facing, drilling, tapering, threading, beveling, heating, or compressing, or any other processing that would not otherwise remove the merchandise from the scope of the investigations if performed in the country of manufacture of the stainless steel flanges.

Merchandise subject to the investigations is typically imported under subheadings 7307.21.1000 and 7307.21.5000 of the Harmonized Tariff Schedule of the United States (HTS). While HTS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

Stainless steel flanges excluded by NPS have a NPS less than 0.5 inches or greater than 24 inches but otherwise meet the definition of stainless steel flanges in the scope.

Purchaser.--Any firm engaged, either directly or through a parent company or subsidiary, in purchasing stainless steel flanges from another firm that produces, imports, or otherwise distributes stainless steel flanges.

Reporting of information.-- If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, and/or purchaser questionnaire), you need not respond to duplicated questions.

Confidentiality--The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. 1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

Verification-- The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

Release of information--The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals.
