Request for Approval under the "Generic Clearance for the Collection of Routine Customer Feedback" (OMB Control Number: 3145-0215)

TITLE OF INFORMATION COLLECTION: Remote Panelist Experience Survey

PURPOSE:

The purpose of this survey is to identify opportunities for enhancing the merit review experience of subject matter experts who participate in National Science Foundation (NSF) merit review meetings that are wholly virtual (100% of participants participate virtually from remote locations) or that have a virtual component (some participants joining the meeting faceto-face and some participants joining the meeting virtually from remote locations). We hope to gather data to help reveal where changes in process or procedure could increase quality and, in turn, heighten interest in and acceptance of remote panelist participation in merit review. We hope that this will result in higher adoption of virtual meetings which would result in enhanced access to merit review meetings.

DESCRIPTION OF RESPONDENTS:

The potential respondents to this survey are US and International research scientists and subject matter experts who are engaged by the National Science Foundation (NSF) to engage in merit review of grant proposals submitted to the agency and to provide advice which enables NSF to make wise investments in all fields of science and engineering research and education. Merit review at NSF is conducted in both face-to-face meetings and virtual meetings via teleconference or video conferencing meetings. This survey will be made available to those reviewers who participate via teleconference and video conference.
