### Clinic Baseline and Annual Reporting System (CBARS)

OMB No. 0920-1074  
Expiration Date: 06/30/2019

Thank you for using the crccp.org website to report data on your partner health systems and clinics. You will use the 'Data Entry' menu to provide baseline and annual information on each clinic, including characteristics of the health system and clinic population, CRC screening rates, and evidence-based interventions and supporting strategies used to increase CRC screening.

#### News/Updates

- November 14, 2016, 3PM: The "export" function was modified to include a "format values" option. This option, selected by default, will format the exported data as it is seen in the data entry screens. The export function also now formats the date fields, removing the "time" portion. The data entry screen now includes "breadcrumbs". These links are located at the top of the data entry pages and show you which record is displayed, and allow you to navigate to another record in the current health system or clinic.
- November 4, 2016, 7AM: A new report was added to the "Reports" area, named "Grantee Edit Report". This new report will display the same information found in the "edits-submit" area, but allows you to create a PDF or Excel file of the edits. This should help you as you work with your Health Systems and Clinics to resolve edits, before you submit your data.
