

Attachment B2 - Federal Register Public Comment

Comment #1:

i am not in favor of taxpayers funding this survey, w this is not at all necessary for life here in america. this is just more busy work for this inept agency.

this is just electronic busyness. such can be and is daily hacked leading to a lot of problems. the budget for this should be cut to zero. the project should be shut down. actually the inept sneaky cdc didn't even put this regulation on the regulations.gov website although they are sending the public there to comment. they are sending the public on a wild goose chase with nothing there.

frustration for the us public. that certainly is no help. shows negligence. this comment is for the public record. please receipt.

it means 1 or 2 - you do them endlessly at great taxpayer expense and you don't even use

them you do it instead of any research to help health conditions
