Practice Name (if provided)  
5 Smith Street  
Nowhere, NC 99999-1111

Dear Dr. Doe,

You have been randomly selected to participate in a brief mail survey on the use of electronic health records in office-based practices. Results from the enclosed survey will be used to track adoption of electronic health records nationwide. We are conducting this as the “National Electronic Health Records Survey” which is affiliated with the National Ambulatory Medical Care Survey (NAMCS) that routinely collects information about office-based practices. I would request that you please take the time to answer the questions in this 30-minute research survey and return it in the enclosed envelope. You are not being asked to provide any patient information for this mail survey.

Data collection for the NAMCS is authorized under Section 306 of the Public Health Service Act (Title 42, U.S. Code, 242k). We are required to keep your survey data confidential in accordance with Section 308(d) of the Public Health Service Act (42, U.S. Code, 242m(d)) and the Confidential Information Protection and Statistical Efficiency Act (Title 5 of PL 107-347). This information will be used for statistical purposes only. Also, we intend to do additional health care research by linking your responses to this survey to available administrative medical information and other related records. The National Center for Health Statistics’ Research Ethics Review Board has approved this research survey.

We look forward to receiving your completed survey on this important public health issue. If you are unable to complete the survey yourself, then an office manager or another staff member could complete the survey on your behalf. As survey participation is voluntary, if you choose not to participate, please answer Questions 2 and 4 on the form and return it to us in the enclosed envelope.

Please accept the enclosed pen as a token of our gratitude. We have routinely relied on the generosity of physicians like you to provide this much needed information to help policy makers, health services researchers, and medical associations understand the current issues with health care delivery in the United States. If you have any questions or comments regarding this study, please call the study coordinator at 1-866-966-1473. Additional information on the survey may be obtained by visiting the NAMCS participant Web site at [www.cdc.gov/namcs](http://www.cdc.gov/namcs).

Thank you for your valuable assistance with this worthy study.

Sincerely,

Charles J. Rothwell  
Director  
National Center for Health Statistics

Practice Name (if provided)  
5 Smith Street  
Nowhere, NC 99999-1111

Dear Dr. Doe,

About four weeks ago, I sent you a 30-minute questionnaire entitled the “National Electronic Health Records Survey” about an important research study on the use of electronic health records in office-based practices. As of the date of this letter, we have not received your survey.

I am writing again because of the importance of your participation to us. Although the survey was sent to other physicians, the value of this study is dependent upon obtaining a good representation of physicians’ unique insights and experiences. The data you provide are invaluable to track the adoption of electronic health records nationwide.

We are required to keep your survey data confidential in accordance with Section 308(d) of the Public Health Service Act (42, U.S. Code, 242m(d)) and the Confidential Information Protection and Statistical Efficiency Act (Title 5 of PL 107-347). All information will be used for statistical purposes only. Also, we intend to do additional health care research by linking your responses to this survey to available administrative medical information and other related records. Although we hope that you will take part in the study, your participation is voluntary.

If you are no longer in practice or do not provide care for ambulatory patients, please answer Question 2 on the survey and return it in the postage-paid envelope. If you choose not to participate, please answer Questions 2 and 4 on the blank questionnaire and return it in the envelope.

Whether you have already mailed a completed survey, are planning to complete the survey, or decided not to participate, we want to thank you very much for your time, effort, and contribution to this important study. If you have any questions or comments regarding this study, please do not hesitate to contact the study coordinator at 1-866-966-1473.

Sincerely,

Charles J. Rothwell  
Director  
National Center for Health Statistics

John Doe, MD  
Practice Name (if provided)  
5 Smith Street  
Nowhere, NC 99999-1111

Dear Dr. Doe,

We have been trying to reach you about an important research study on the use of electronic health records in office-based practices. Results from the enclosed 30-minute questionnaire will be used to track adoption of electronic health records nationwide. We are conducting this as a special “National Electronic Health Records Survey” to the National Ambulatory Medical Care Survey (NAMCS) which routinely collects information about office-based practices. You are not being asked to provide any patient information for this mail survey and participation is voluntary. All information will be used for statistical purposes only. Also, we intend to do additional health care research by linking your responses to this survey to available administrative medical information and other related records.

This research study is drawing to a close, and one of our concerns is that those physicians who have not responded to the survey may have different experiences from those who have returned surveys. In order to make statistically valid conclusions from the study, we need to hear from all types of physicians. If you are unable to complete the survey yourself within the next week, then an office manager or another staff member could complete the survey on your behalf. I urge you to complete the survey and return it in the postage-paid envelope.

If you are no longer in practice or do not provide care for ambulatory patients, please answer Question 2 on the survey and return it in the postage-paid envelope. If you choose not to participate, please answer Questions 2 and 4 on the form and return it to us in the enclosed envelope.

Whether you have already mailed a completed survey, are planning to complete the survey, or decided not to participate, we want to thank you very much for your time, effort, and contribution to this important study. If you have any questions or comments regarding this study, please do not hesitate to contact the study coordinator at 1-866-966-1473.

Sincerely,

Charles J. Rothwell  
Director  
National Center for Health Statistics

**Post Card Reminder:**

Last week a questionnaire was mailed to you requesting your participation in an important research study of electronic health records in office-based practices.

If you have already returned the questionnaire, let me take this opportunity to thank you for your contribution to this research. If not, please do so today. Your participation in the study is critical to its success and to improving the understanding of the adoption of electronic health records systems in the United States.

If you did not receive the questionnaire, or if you have misplaced it, please call our toll-free number at 1-866-966-1473 and we will be happy to send you another one.

Thank you for your participation.

A handwritten signature in black ink, appearing to read "Charles J. Rothwell". The signature is fluid and cursive, with a large, stylized initial "C" and "R".

Charles J. Rothwell
