

NPIN Evaluation Focus Group Confirmation Email

Thank you for your interest in attending a focus group for CDC's National Prevention Information Network (NPIN). Only public health professionals like you can provide us with the necessary feedback to improve NPIN and its services, and that is why we want you to participate in a focus group near you.

Please find the information regarding attending the focus group below:

Date: *[insert date]*

Times: *[insert time options]*

Location: *[insert address here and any parking directions]*

Other relevant information:

- You will receive your \$75 token of application upon attendance.
- For questions regarding your participation please contact *[insert local contact information]*

More about the NPIN Evaluation:

It's been several years since NPIN was last evaluated, and we know that the landscape of health communication and health technology has changed considerably. The purpose of the focus group is to evaluate the awareness, perceptions, and use of NPIN resources among public health professionals who work in HIV, STDs, viral hepatitis, tuberculosis, and adolescent sexual health. Your valuable input will enable us to better meet your needs for disease prevention resources and to support positive health outcomes across the nation.

NPIN is dedicated to providing the most current, high-quality, and useful prevention and treatment resources, and we need your feedback to optimize our efforts.
