The values of 1 for Male and 2 for Female will be accepted on non-EDR reports (position 125 = Space), but values of M, F or U are preferred.

Summary of Changes to DFSTATE format

The State Death (DFSTATE) format has changed to include fields needed for Electronic Death Registration (EDR) processing. Only states that will participate in EDR need to make changes to the record.

Three new fields have been added:

EDR VERIFY CODE

- Show a 'Y' when the report was submitted through the EDR system, online SSN verification was requested and the SSN was verified.
- Show an 'N' when the report was submitted through the EDR system, online SSN verification was requested, but the SSN was not verified.
- Show a space when the report was not submitted through the EDR system, or the report was submitted through the EDR system, but online SSN verification was not requested.

DATE OF SSN VERIFICATION

This field is mandatory when a report is submitted through the EDR system and online SSN verification was requested (i.e., when position 125 = Y or N), otherwise it should be spaces. When needed, it is the date of the online SSN verification attempt. If more than one verification attempt is made, use the date of the latest attempt.

DATE OF STATE TRANSMISSION

This field is mandatory when a report is submitted through the EDR system and online SSN verification was requested (i.e., when position 125 = Y or N), otherwise it should be spaces. This is the date that the record is transmitted to SSA.

In addition, filler size decreased from 26 to 9 characters and it appears at the end of the record. It should always be spaces.

All fields are alphanumeric.
