[Information for facilitator(s)] The purpose of this semi-structured interview is to learn more about current subrecipients’ perceptions, insights, and experiences with the Trafficking Victim Assistance Program (TVAP) and its per capita funding model. The information will be used to better understand the operations and efficiencies of TVAP.

Preamble/Moderator’s Opening Statements

Thank you very much for agreeing to participate in this interview. I’m *[interviewer name]*, and I will facilitate today’s session. I am joined by *[support staff and their role]*. We are from ICF, an independent research and consulting firm. This discussion is part of a larger program assessment of the Trafficking Victim Assistance Program (TVAP) being funded by the Office on Trafficking in Persons to better understand the operations and efficiencies of TVAP. You were invited to participate in this interview because your organization receives TVAP funding for trafficking-related services.

[Include if needed based on interviewee knowledge of TVAP] As a reminder, TVAP is a grant program intended to fund time-limited comprehensive case management services on a per capita basis to foreign national victims of a severe form of trafficking in persons and potential victims of trafficking seeking HHS certification in any location within the United States. Persons qualified for services under this grant means victims of a severe form of trafficking in persons who have received HHS certification; potential victims of a severe form of trafficking who are actively seeking HHS certification; a family member in receipt of a derivative T visa issued by DHS; and minor dependent children of foreign victims of severe forms of trafficking in persons or potential victims of trafficking. Your organization is a subrecipient of TVAP funds that have been awarded to *[insert corresponding grantee’s organization]*.

Participation in this interview is voluntary; you may choose not to answer any questions, or stop participating at any time. Participation or responses will not influence your grant funding. There are no anticipated risks or discomforts associated with participation in this interview. All of the information you share with us today will be kept confidential. What you say will not be identified with your name. Any direct quotes that ICF uses for the purposes of reporting will not be associated with any individual person or organization but will be shared with the Office on Trafficking in Persons anonymously.

The information gathered in this interview will be combined with other information gathered through the assessment to identify possible strategies to maximize the reach and impact of funding for trafficking-related services to best meet the needs of the field.
