SUPPLEMENTAL INFORMATION:

OMB Approval No. 2138-0018

Title: Report of Passengers Denied Confirmed Space

Form No. BTS Form 251

Type Of Review: Reinstatement of an expired approved collection

Respondents: Large certificated air carriers

Number of Respondents: 16

Number of Responses: 64

Total Annual Burden: 640 hours.

Needs and Uses: BTS Form 251 is a one-page report submitted four times per year, on the number of passengers denied seats either voluntarily or involuntarily, whether these bumped

passengers were provided alternate transportation and/or compensation, and the amount of the payment. U.S. air carriers that account for at least 1 percent of domestic scheduled-service passenger revenues must report oversales on all operations with 30 seats or larger aircraft that depart a U.S. airport.

Carriers do not report data from inbound international flights to the United States because the protections of 14 CFR Part 250 *Oversales* do not apply to these flights. The report allows the Department to monitor the effectiveness of its oversales rule and take enforcement action when necessary. The involuntarily denied-boarding rate has decreased from 4.38 per 10,000 passengers in 1980 to 0.71 for the quarter ended December 2011. Without Form 251, determining the effectiveness of the Department's oversales rule would be impossible. The publishing of the carriers' individual denied boarding rates has diminished the need for more intrusive regulation. The rate of denied boarding can be examined as a continuing fitness factor. This rate provides an insight into a carrier's customer service practices. A rapid sustained increase in the rate of denied boarding may indicate operational difficulties. Because the rate of denied boarding is released quarterly, travelers and travel agents can select carriers with lower incidences of bumping passengers. This information is available in the *Air Travel Consumer Report* at: <http://airconsumer.ost.dot.gov/reports/index.htm>. The *Air Travel Consumer Report* is also sent to newspapers, magazines, and trade journals. The public availability of this information deters carriers from setting unreasonable overbooking rates – a market-based mechanism that is more efficient than direct regulation of those rates.

The Confidential Information Protection and Statistical Efficiency Act of 2002 (44 USC 3501 note) requires a statistical agency to clearly identify information it collects for non-statistical purposes. BTS hereby notifies the respondents and the public that BTS uses the

information it collects under this OMB approval for non-statistical purposes including, but not limited to, publication of both Respondent's identity and its data, submission of the information to agencies outside BTS for review, analysis, and possible use in regulatory and other administrative matters.

Issued in Washington, DC, on July 12, 2013.
