

Attachment 6A. Telephonic script to contact Zika virus disease cases to obtain additional clinical information

Hello, my name is _____ and I work for the _____ health department. May I please speak to _____/the parent or guardian of _____?

I am contacting you as you were/your child was diagnosed with Zika virus disease in the last year. We are currently trying to learn more about Zika. We want to know more about what neurologic symptoms patients have, what kinds of treatment they received, and if they got better. This information will be used in the future to provide patients and doctors with better information about what to expect.

If you agree, we would like to ask you some questions about your/your child's illness. We have some information already so it will just be a few additional questions. Do you have 5-10 minutes now to talk to me? If not, is there a better time to reach you?

Thank you for your time today.
