PRIVACY THRESHOLD ANALYSIS (PTA)

The PTA is a compliance form developed by the Privacy Branch to identify the use of Personally Identifiable Information (PII) across the Department. The PTA is the first step in the PII verification process, which focuses on these areas of inquiry:

- Purpose for the information,
- Type of information,
- Sensitivity of the information,
- Use of the information,
- And the risk to the information.

Please use the attached form to determine whether a Privacy and Civil Liberties Impact Assessment (PCLIA) is required under the E-Government Act of 2002 or a System of Record Notice (SORN) is required under the Privacy Act of 1974, as amended.

Please complete this form and send it to your program Privacy Liaison Officer (PLO). If you have no program Privacy Liaison Officer, please send the PTA to the HUD Privacy Branch:

SPECIFIC PTA QUESTIONS

1. **Reason for submitting the PTA:**	

This PRA is a revision of a currently approved collection that expires on October 30, 2017. The purpose of a Jobs Plus program is to develop locally-based approaches such as work readiness, educational advancement and financial counseling to increase earnings and advance employment outcomes among public housing residents. The goal of the program is to provide intensive employment services for residents of public housing to eliminate persistent poverty. Programs will be designed to provide work incentives, to implement employment training, placement and retention strategies, and to promote community or neighbor-to-neighbor support for work opportunities among public housing residents. Primary applicants will be Public Housing Agencies (PHAs) working in tandem with key partners including local Workforce Investment Boards (WIBs) and the One-Stop Career Centers or American Job Centers they oversee, in addition to other partnering organizations that provide supportive services to public housing residents enrolled in Jobs Plus.

The total number of burden hours requested between the revised PRA submission and the previously approved PRA collection request decreased by seventeen percent (17%) – from 8959 burden hours to 7472 burden hours. The original number of annual respondents was estimated to be 125. The last three competitions indicate that 75 replies, each year, are expected to be received in response to the Jobs Plus NOFA.

[3] HUD defines personal information as "Personally Identifiable Information" or PII, which is any information that permits the identity of an individual to be directly or indirectly inferred, including any information that is linked or linkable to that individual, regardless of whether the individual is a U.S. citizen, lawful permanent resident, visitor to the U.S., or employee or contractor to the Department. "Sensitive PII" is PII, which if lost, compromised, or disclosed without authorization, could result in substantial harm, embarrassment, inconvenience, or unfairness to an individual. For the purposes of this PTA, SPII and PII are treated the same.

For example, is the system a Local Area Network (LAN) or Wide Area Network (WAN)?	please answer this question.
4(h) If header or payload data[4] is stored in the communication traffic log, please detail the data elements stored.	
N/A	

5. Does this project, program, or system connect, receive, or share PII with any other HUD programs or systems?	☒ No. ☐ Yes. If yes, please list: Click here to enter text.
6. Does this project, program, or system connect, receive, or share PII with any external (non-HUD) partners or systems?	☒ No. ☐ Yes. If yes, please list: Click here to enter text.

[4] Header: Information that is placed before the actual data. The header normally contains a small number of bytes of control information, which is used to communicate important facts about the data that the message contains and how it is to be interpreted and used. It serves as the communication and control link between protocol elements on different devices.

Payload data: The actual data to be transmitted, often called the payload of the message (metaphorically borrowing a term from the space industry!) Most messages contain some data of one form or another, but some actually contain none: they are used only for control and communication purposes. For example, these may be used to set up or terminate a logical connection before data is sent.

[5] FIPS 199 is the Federal Information Processing Standard Publication 199, Standards for Security Categorization of Federal Information and Information Systems and is used to establish security categories of information systems.

	☐ Yes. Please indicate the determinations for each of the following: Confidentiality: ☐ Low ☐ Moderate ☐ High Integrity: ☐ Low ☐ Moderate ☐ High Availability: ☐ Low ☐ Moderate ☐ High
