

Application for Construction Permit for Commercial Broadcast Station, FCC Form 301; FCC Form 2100, Application for Media Bureau Audio and Video Service Authorization, Schedule A; 47 Sections 73.3700(b)(1) and (b)(2) and Section 73.3800, Post Auction Licensing

SUPPORTING STATEMENT

A. Justification:

1. FCC Form 301 is used to apply for authority to construct a new commercial AM, FM, or TV broadcast station and to make changes to existing facilities of such a station. It may be used to request a change of a station's community of license by AM and non-reserved band FM permittees and licensees. In addition, FM licensees or permittees may request, by filing through an application on FCC Form 301, upgrades on adjacent and co-channels, modifications to adjacent channels of the same class, and downgrades to adjacent channels. All applicants using this one-step process must demonstrate that a suitable site exists that would comply with allotment standards with respect to minimum distance separation and principal community coverage and that would be suitable for tower construction. For applicants to seek a community of license change through this one-step process, the proposed facility must be mutually exclusive with the applicant's existing facility, and the new facility must comply with the Commission's standards with respect to minimum distance separation and principal community coverage. Applicants availing themselves of this procedure must also attach an exhibit demonstrating that the proposed community of license change comports with the fair, efficient, and equitable distribution of radio service, pursuant to Section 307(b) of the Communications Act of 1934, as amended (the "Act").

Similarly, to receive authorization for commencement of Digital Television ("DTV") operations, commercial broadcast licensees must file FCC Form 2100, Schedule A for a construction permit. The application may be filed anytime after receiving the initial DTV allotment and before mid-point in the applicant's construction period. The Commission will consider the application as a minor change in facilities. Applicants will not have to provide full legal or financial qualification information.

For now, in the initial phase of the "Licensing and Management System"¹ roll-out, the new Form 2100 is replacing the Form 301 only for the filing of full-service digital television construction permits. The Form 301 is still being used, under the name Form 301, to apply for authority to construct a new commercial AM or FM radio station and to make changes to the existing facilities of such an AM or FM station.

FCC Form 301 accommodates commercial FM applicants applying in a Threshold Qualifications Window ("TQ Window") for a Tribal Allotment.² A commercial FM applicant applying in the TQ Window, who was not the original proponent of the Tribal Allotment at the rulemaking stage, must demonstrate that it would have qualified in all respects to add the particular Tribal Allotment for which it is applying. Additionally, a petitioner seeking to add a Tribal Allotment to the FM Table of Allotments must file Form 301 when submitting its Petition for Rulemaking. The collection also accommodates

¹ The Commission implemented a new on-line (electronic) licensing system called "Licensing and Management System" in which all FCC broadcast licensing forms, including FCC Form 301, will be combined into a single common form - FCC Form 2100. FCC Form 301 will be encompassed by the "Licensing and Management System" and the new common form - FCC Form 2100. General questions, which were formerly asked in all licensing applications, will compose the body of FCC Form 2100. The questions pertinent only to FCC Form 301 applicants will now be contained in Schedule A of FCC Form 2100. The substance of FCC Form 301 remained the same in the new system/form. The wording of each question applicable to FCC Form 301 applicants in FCC Form 2100 is identical to that of the FCC Form 301, with one exception - "Alien Ownership," but as stated, the substance remained the same.

² Office of Management and Budget (OMB) approved the information collection requirements contained in FCC 11-190 on April 27, 2012.

Application for Construction Permit for Commercial Broadcast Station, FCC Form 301; FCC Form 2100, Application for Media Bureau Audio and Video Service Authorization, Schedule A; 47 Sections 73.3700(b)(1) and (b)(2) and Section 73.3800, Post Auction Licensing

applicants applying in a TQ Window for a Tribal Allotment that had been added to the FM Table of Allotments using the Tribal Priority under the “threshold qualifications” procedures.

This collection also includes the third party disclosure requirement of 47 CFR § 73.3580. This rule requires applicants to provide local public notice, in a newspaper of general circulation published in a community in which a station is located, of requests for new or major changes in facilities and for changes of a station’s community of license by AM and non-reserved band FM permittees and licensees. The notice must be completed within 30 days of tendering the application and must be published at least twice a week for two consecutive weeks in a three-week period. A copy of the notice and the application must be placed in the station’s public inspection file, pursuant to Section 73.3527.³

Revised Information Collection Requirements Which Require Review and Approval from the Office of Management and Budget (OMB):

The Commission is submitting this revision to this information collection which results from the rule provisions adopted in the FCC 17-29. On March 23, 2017, the Commission adopted the Report and Order, *Channel Sharing by Full Power and Class A Stations Outside the Broadcast Television Spectrum Incentive Auction Context*, GN Docket No. 12-268, MB Docket No. 03-185, MB Docket No. 15-137, FCC 17-29 (“*Report and Order*”). This document approved channel sharing outside of the incentive auction context between full power, Class A, Low Power Television (LPTV) and TV translator stations.

Although there are no changes to the FCC Form 2100, Schedule A itself, there are changes to the substance, burden hours, and costs as described herein.

47 C.F.R. section 73.3800 allows full power television stations to channel share with other full power stations, Class A, LPTV and TV translator stations outside of the incentive auction context. Full power stations file FCC Form 2100, Schedule A in order to obtain Commission approval to operate on a shared channel.

Information Collection Requirements Which Have Not Changed Since Last Approved by OMB:

47 C.F.R. section 73.3700(b)(1)(i) requires licensees of reassigned stations, UHF-to-VHF stations, and High-VHF-to-Low-VHF stations to file a minor change application for a construction permit for the channel specified in the Channel Reassignment Public Notice using FCC Form 2100 Schedule A (for a full power station) or E (for a Class A station)⁴ within three months of the release date of the Channel Reassignment Public Notice. Licensees that are unable to meet this filing deadline may request a waiver of the deadline no later than 30 days prior to the deadline. The Commission will treat post-auction construction permit applications as minor changes.⁵

47 C.F.R. section 73.3700(b)(1)(ii) permits licensees of stations reassigned to a new channel within their existing band to propose transmission facilities in their construction permit applications that

³ The recordkeeping information collection requirement is contained in OMB Control Number 3060-0214, which covers Section 73.3527.

⁴ FCC form 2100, Schedule E is approved under OMB control number 3060-0932.

⁵ *Incentive Auction R&O* at 29 FCC Rcd at 6789. Unlike major change applications, minor change applications are not subject to local public notice requirements or a 30-day petition to deny filing window. 47 C.F.R. §§ 73.3580, 73.3584.

Application for Construction Permit for Commercial Broadcast Station, FCC Form 301; FCC Form 2100, Application for Media Bureau Audio and Video Service Authorization, Schedule A; 47 Sections 73.3700(b)(1) and (b)(2) and Section 73.3800, Post Auction Licensing

will extend their coverage contours, as defined by the technical parameters specified in the Channel Reassignment Public Notice, if such facilities: (A) are necessary to achieve the coverage contour specified in the Channel Reassignment Public Notice or to address loss of coverage area resulting from the new channel assignment; (B) will not extend a full power television station's noise limited contour or a Class A television station's protected contour by more than one percent in any direction; and (C) will not cause new interference, other than a rounding tolerance of 0.5 percent, to any other broadcast television station.

47 C.F.R. section 73.3700(b)(1)(iii) permits licensees of UHF-to-VHF stations or High-VHF-to-Low-VHF stations to propose transmission facilities in their construction permit application that will extend their coverage contour, as defined by the technical parameters specified in the Channel Reassignment Public Notice, if the proposed facility will not cause new interference, other than a rounding tolerance of 0.5 percent, to any other broadcast television station.

47 C.F.R. section 73.3700(b)(1)(iv)(A) permits licensees of reassigned stations, UHF-to-VHF stations, or High-VHF-to-Low-VHF stations that, for reasons beyond their control, are unable to construct facilities that meet the technical parameters specified in the Channel Reassignment Public Notice, or the permissible contour coverage variance from those technical parameters specified in paragraph (b)(1)(ii) or (iii) of this section, to request a waiver of the construction permit application deadline specified in paragraph (b)(1)(i) no later than 30 days prior to the deadline. If the waiver request is granted, the licensee will be afforded an opportunity to submit an application for a construction permit pursuant to paragraph (b)(2)(i) or (ii) of this section in a priority filing window to be announced by the Media Bureau by public notice.

47 C.F.R. section 73.3700(b)(1)(iv)(B) permits the licensee of any broadcast television station that the Commission makes all reasonable efforts to preserve pursuant to Section 6403(b)(2) of the Spectrum Act that is predicted to experience aggregate new interference to population served in excess of one percent as a result of the repacking process to submit an application for a construction permit pursuant to paragraph (b)(2)(i) or (ii) of this section in the priority filing window required by paragraph (b)(1)(iv)(A).

47 C.F.R. section 73.3700(b)(1)(v) states that construction permit applications filed pursuant to paragraph (b)(1)(i) of this section will be afforded expedited processing if the application: (A) does not seek to expand the coverage area, as defined by the technical parameters specified in the Channel Reassignment Public Notice, in any direction; (B) seeks authorization for facilities that are no more than five percent smaller than those specified in the Channel Reassignment Public Notice with respect to predicted population served; and (C) is filed within the three-month deadline specified in paragraph (b)(1)(i) of this section.

47 C.F.R. section 73.3700(b)(1)(vii) requires channel sharee stations⁶ to file a minor change application for a construction permit for the channel on which the channel sharer operates at least sixty (60) days prior to the date by which it must terminate operations on its pre-auction channel pursuant to § 73.3700(c)(4)(i) and (ii) of this rule. The application must include a copy of the executed channel sharing agreement.

⁶ A "channel sharee" station is a television station for which a winning channel sharing bid was submitted. A "channel sharer" station is a television station that shares its channel with a channel sharee.

Application for Construction Permit for Commercial Broadcast Station, FCC Form 301; FCC Form 2100, Application for Media Bureau Audio and Video Service Authorization, Schedule A; 47 Sections 73.3700(b)(1) and (b)(2) and Section 73.3800, Post Auction Licensing

47 C.F.R section 73.3700(b)(2)(i) permits the licensee of a reassigned station, a UHF-to-VHF station, or a High-VHF-to-Low-VHF station to file a major change application for a construction permit for an alternate channel on FCC Form 2100 Schedules A (for a full power station) and E (for a Class A station) during a filing window to be announced by the Media Bureau by public notice, provided that: (A) The licensee of a UHF-to-VHF station cannot request an alternate UHF channel; (B) The licensee of a UHF-to-VHF station that specified the high-VHF band or the low-VHF band in its UHF-to-VHF bid cannot request a VHF channel outside of the assigned band; and (C) The licensee of a High-VHF-to-Low-VHF station cannot request an alternate high-VHF channel.

47 C.F.R section 73.3700(b)(2)(ii) permits the licensee of a reassigned station, a UHF-to-VHF station, or a High-VHF-to-Low-VHF station to file a minor change application for a construction permit on FCC Form 2100 Schedules A (for a full power station) and E (for a Class A station) during a filing window to be announced by the Media Bureau by public notice, in order to request a change in the technical parameters specified in the Channel Reassignment Public Notice with respect to height above average terrain (HAAT), effective radiated power (ERP), or transmitter location that would be considered a minor change under §§ 73.3572(a)(1),(2) or 74.787(b) of this chapter.

This information collection does not affect individuals or households; thus, there are no impacts under the Privacy Act.

Statutory authority for this collection of information is contained in Sections 154(i), 303 and 308 of the Communications Act of 1934, as amended.

2. Agency Use of Information: FCC staff members use the data to determine whether commercial broadcast station construction permit applicants meet basic statutory requirements to become a Commission licensee/permittee and to assure that the public interest would be served by grant of the application.

3. Consideration Given to Information Technology: The Commission requires commercial television broadcast station construction permits applicants to file FCC Form 2100, Schedule A electronically through the "Licensing and Management System" and FCC Form 301 electronically.

4. Effort to Identify Duplication and Use Similar Information: This agency does not impose a similar information collection on the respondents. There are no similar data available.

5. Effort to Reduce Small Business Burden: In conformance with the Paperwork Reduction Act of 1995, the Commission is making an effort to minimize the burden on all respondents. The Commission has limited the information requirements to those that are absolutely necessary for evaluating and processing the applications filed in a TQ Window and to deter possible abuses of the processes. Therefore, this information collection will not have a significant economic impact on small entities/businesses.

6. Less Frequent Data Collection: Each licensee of a full-power station that is reassigned to a new channel following the Incentive Auction, those full-power stations that are winning bidders that move from UHF-to-VHF or from High-VHF-to-Low-VHF, and full-power channel sharee stations must file a minor change application for a construction permit using FCC Form 2100 Schedule A. For all other uses of FCC Form 2100 and FCC Form 301, the frequency of filing is determined by the respondents. However, no new or modified TV or DTV facilities can be obtained or modified without using FCC Form 2100, Schedule A.

7. **Information Collection Circumstances:** This collection of information is consistent with the guidelines in 5 CFR § 1320.5(d)(2).

8. **Public Comment Period:** Opportunity for public comment on this information collection requirement has been published in the *Federal Register* on April 13, 2017 (82 FR 17828). No comments were received from the public.

9. **Payment or Gift:** No payment or gift was provided to respondents.

10. **Confidentiality of Information:** There is some need for confidentiality with this information collection. When filing a channel sharing agreement with the agency under 47 C.F.R. section 73.3700(b)(1) (vii), applicants may redact confidential or proprietary terms.⁷

11. **Justification for Sensitive Questions:** This information collection does not address any private matters of a sensitive nature.

12. The burden for this collection is as follows:

- a. Revised Data Collections: The estimated burden for this collection associated with the categories “minor TV applications” and “DTV applications” are being revised in light of FCC 17-29.

Total Number of Annual Respondents: 735 Station Licensees

Total Number of Annual Responses: 735 FCC Form 2100, Schedule A Forms

Annual Burden Hours:

We estimate a total of 3.0 hours to complete the application process.

510 minor change applications x 3 hours/form = 1,530

225 major change applications x 3 hours/form = 675

Total Annual Burden Hours: 2,205 hours

Annual “In House” Cost:

The respondent is estimated to have an average salary of \$100,000/year (\$48.08/hour).

510 minor applications x 3 hours/form x \$48.08/hour = \$73,562.40

225 major applications x 3 hours/form x \$48.08/hour = \$32,454.00

Total Annual “In House” Cost: \$106,016.40

These estimates are based on FCC staff's knowledge and familiarity with the availability of the data required.

Total Annual Burden Hours: 13,112 hours¹¹

We assume that commercial broadcast station construction permit applicants will consult with an outside attorney and a consulting engineer to complete an FCC Form 2100, Schedule A and FCC Form 301. The time spent in consultation with these attorneys and consulting engineer will vary depending upon the application type.

The Commission estimates that it will take the respondent one hour to fulfill the newspaper notice requirement.

We estimate that commercial broadcast station construction permit applicants would have an average salary of \$100,000/year (\$48.08/hour).

a. We assume that each applicant/licensee/permittee will use a communications attorney (\$300/hour) and a consulting engineer (\$250/hour) to assist in preparing and filing FCC Form 2100, Schedule A. We estimate these attorneys will spend approximately 2 hours reviewing the form and will charge approximately \$300/hour for the legal review. We also assume that a consulting engineer will spend approximately 45 hours to complete certain engineering aspects of FCC Form 2100, Schedule A for a minor change and 34 hours for a major/DTV change and will charge the respondent \$250/hour for the engineering services.
