Change Request (83-C)

January 22, 2021

The Food and Drug Administration is submitting this nonmaterial/non-substantive change request (83-C) to incorporate minor modifications to the study documents for the Research and Evaluation Survey for the Public Education Campaign on Tobacco among LGBT Young Adults (RESPECT).

This change request is to revise the data collection documents for the additional follow-up waves of data collection (follow-up surveys 2-3) for RESPECT, the first of which will begin in March 2017. The follow up data collection will involve re-contacting respondents from previous waves (i.e., longitudinal participants) and recruiting new respondents (i.e., cross-sectional participants) to offset loss to follow-up.

In conversations with OMB in the past, we noted that we expected to have non-substantive changes to our instruments based on the development/changes to the campaign creative. OMB provided concurrence to submit this change.

Details of the changes are included in the table below:
