Opioid State Targeted Response (STR) Evaluation

State/Territory STR Director Final Survey

The purpose of this evaluation is to collect important grantee-level information about the implementation of the Substance Abuse and Mental Health Services Administration (SAMHSA) Opioid State Targeted Response (STR) grant. Survey questions focus on opioid use disorder* services and activities in your state/territory using Opioid STR funds. Survey results will be aggregated to protect anonymity. It will take approximately <u>four (4) hours</u> to complete this survey, including the time for reviewing instructions, searching existing data sources, gathering the data needed to answer questions, and answering the questions. The survey does not need to be completed in one sitting, and will automatically save your answers as you enter them.

<u>*Except where noted, all questions in this survey refer to prevention strategies, treatment and/or recovery services for opioid use disorder and related conditions (e.g., non-medical use of prescription pain medication, heroin users, one-time users, overdose) in your state/territory one year since you completed the last survey in the spring of 2018.</u> For the Diagnostic and Statistical Manual of Mental Disorders (DSM-5) definition of opioid use disorder, please refer to the attached glossary.

Helpful Materials

Before completing the survey, it may be helpful to gather the following materials to help answer questions:

- Funding and budget information;
- Intervention implementation materials (curricula, programs, etc.);
- Evaluation findings and reports; and
- Organizational policies.

Please provide your contact information and information about your current position and role on the Opioid STR grant below.

What is your role in the Opioid STR grant?

Needs & Resources

This section focuses on your state/territory's needs related to addressing opioid use disorder, and the resources available to your state/territory to address opioid use disorder.

Describe the geographic areas/locations in your state/territory where <u>opioid use disorder</u> was most prevalent as of May 1, 2019. Provide the data source used to make this determination.

Did your state/territory receive any funding (other than the Opioid STR grant) that you used for opioid use disorder prevention strategies, treatment, and/or recovery services (including any federal, state, local, foundation, or private funding) between May 1, 2018 and April 30, 2019?

○₁ Yes ➡ **GO TO QUESTION 8**

○₀ No   **GO TO QUESTION 9**

In the table below, indicate whether your state/territory used each funding source for opioid use disorder prevention strategies, treatment, and/or recovery services between May 1, 2018 and April 30, 2019. Where possible, estimate the amount of funding your state/territory has received and used for <u>opioid use disorder prevention strategies, treatment, and/or recovery services</u> between May 1, 2018 and April 30, 2019. (If grant program spans two fiscal years, please include funding received and used during both fiscal years.)

	Funding Source	Check if funding received	Total amount received	Total amount used for opioid prevention strategies	Total amount used for opioid treatment, and/or recovery services

This section focuses on data sources available to your state/territory and data management strategies used to address opioid use disorder.

Between May 1, 2018 and April 30, 2019, did your state/territory collect information on how it implements <u>prevention strategies</u> that address opioid use disorder (e.g., what prevention approaches are implemented, who implements them, what population(s) and/or geographic areas are targeted, how many dollars are spent, who monitors reach and/or impact)?

- ◯₁ Yes

Between May 1, 2018 and April 30, 2019, did your state/territory collect information on how it implements <u>treatment and/or recovery services</u> interventions that address opioid use disorder (e.g., what treatment/recovery services are implemented, who implements them, what population(s) and/or geographic areas are targeted by type, how many dollars are spent, who monitors impact)?

- ◯₁ Yes
- ◯₀ No

Between May 1, 2018 and April 30, 2019, did your state/territory integrate opioid use disorder data (such as data that must be reported for the Opioid STR grant) with data from other agencies/groups to address opioid use disorder (e.g., data from pharmacies, poison control, first responders, etc.)?

- ◯₁ Yes
- ◯₀ No

Between May 1, 2018 and April 30, 2019, did your state/territory share state/territory-level data with key stakeholders to address opioid use disorder?

- ◯₁ Yes
- ◯₀ No

In the table below, indicate whether your agency had access to the following community-level and state-level data elements as of May 1, 2019.

		Data Access					
		Did your agency have access to these data at the state-level?			Did your agency have access to these data at the community-level?

Prescription Drug Monitoring Program (PDMP) Data

As of May 1, 2019, did your state/territory have an active Prescription Drug Monitoring Program (PDMP)?

○ₗ Yes

○₀ No

○ₐ Don't know

As of May 1, 2019, did your state/territory have access to the PDMP to extract and use data?

○ₗ Yes

○₀ No

○ₐ Don't know

Did your state/territory use PDMP data for the following purposes between May 1, 2018 and April 30, 2019?

MARK ONE FOR EACH ROW

		YES	NO
a.	Help select and implement strategies and services to address opioid use disorder	○₁	○₀
b.	Help make decisions about selecting providers and organizations that receive Opioid STR funding (that is, Opioid STR sub-recipients)	○₁	○₀
c.	Extract and report rates of physician registration with prescription drug monitoring program	○₁	○₀
d.	Extract and report use of PDMP by physicians (number of queries; percentage of physicians making queries)	○₁	○₀
e.	Extract and report opioid prescribing rates	○₁	○₀

Which PDMP data management and data use activity or activities has your state/territory completed between May 1, 2018 and April 30, 2019?

SELECT ALL THAT APPLY

- ☐₁ Increased access to PDMP data at the grantee/state/territory level
- ☐₂ Increased access to PDMP data at the sub-recipient level
- ☐₃ Increased usage of PDMP data at the grantee/state/territory level
- ☐₄ Increased usage of PDMP data at the sub-recipient level
- ☐₅ Increased the quality of PDMP data collected
- ☐₆ Increased registration for the PDMP
- ☐₇ Increased voluntary PDMP enrollment
- ☐₈ Increased mandatory PDMP enrollment
- ☐₉ Increased timely data upload by pharmacists to the PDMP
- ☐₁₀ Integrated PDMPs with electronic health records
- ☐₁₁ Integrated PDMPs with health information exchanges
- ☐₁₂ Integrated PDMP data with vital records (e.g., deaths)
- ☐₁₃ Increased reports to prescribers
- ☐₁₄ Increased reports to dispensers
- ☐₁₅ Increased reports to licensing boards
- ☐₁₆ Any other efforts to improve data infrastructure (Specify)

Infrastructure

One of the goals of the Opioid STR program is to understand and support the infrastructure at the state/territory and community levels needed to address opioid use disorder. This section focuses on ways in which your state has used and leveraged structures, processes, and policies to address opioid use disorder in your state.

Which of the following guidelines and regulations existed in your state/territory as of May 1, 2019?

SELECT ALL THAT APPLY

☐₁ Required universal registration with the Prescription Drug Monitoring Program (PDMP)

☐₂ Doctors can assign authorized delegates to access the PDMP

☐₃ Requirements for prescribers to query PDMP before prescribing opioids in certain conditions (e.g., for more than short-term use)

☐₄ Pharmacists have a set timeframe for uploading opioid dispensing data

☐₅ Using PDMP data for public health surveillance and prevention

☐₆ Inter-state agreements to share PDMP data

☐₇ Requirements for prescribers to receive training on safe opioid prescribing

☐₈ Limit to dose of opioid prescription without special approval

☐₉ Limit to the duration of opioid prescription without special approval

☐₁₀ Limit to the duration of opioid prescription for non-cancer patients without special approval

☐₁₁ Requirements to regularly certify pain clinics by the state medical board

☐₁₂ Requirements that pain clinics must be owned and operated by a licensed physician

☐₁₃ Other relevant PDMP guidelines or regulations not captured above (Specify)

Did your state/territory create a state-level workgroup to address opioid use disorder that met regularly (e.g., every two weeks, monthly, quarterly) between May 1, 2018 and April 30, 2019?

- ○₁ Yes, my state/territory created a workgroup that met regularly
- ○₂ No, my state/territory did not create a workgroup because we already had one that met regularly
- ○₃ No, my state/territory did not create – nor did we have - a workgroup

Did your state/territory create a statewide/territory-wide strategic plan to address opioid use disorder, including prevention of overdose and misuse, treatment and recovery services between May 1, 2018 and April 30, 2019?

- ○₁ Yes, my state/territory created a strategic plan
- ○₂ No, my state/territory did not create a strategic plan because we already had a strategic plan.
- ○₃ No, my state/territory did not create – nor did we have - a strategic plan.

Addressing Opioid Use Disorder

This section focuses on opioid use disorder prevention strategies, treatment, and/or recovery services available in your state/territory.

In the table below, provide the total number of a) people who received opioid use disorder-specific <u>treatment services</u>, and b) people who received opioid use disorder-specific <u>recovery services</u> in your state/territory between May 1, 2018 and April 30, 2019. Please provide the total number who received these services as a result of Opioid STR funding.

	TOTAL
a. Total number of people who received treatment services between May 1, 2018 and April 30, 2019.	
b. Total number of people who received recovery services between May 1, 2018 and April 30, 2019.	

In the table below, to the best of your knowledge, list all of the opioid-specific prevention strategies that your state/territory delivered between May 1, 2018 and April 30, 2019, the type of <u>prevention strategy</u> delivered, and the total number of people that received each strategy. Primary prevention refers to preventing new cases of opioid use disorder, while secondary prevention refers to identifying and treating opioid use disorder early on. Please indicate whether any of these strategies were a result of Opioid STR funding.

	Prevention strategy	Type of prevention strategy (Primary or Secondary)	Total number of people that received the strategy (if able to obtain)	Was strategy implemented using Opioid STR funding? *SELECT ONE* YES	NO
a.				$\bigcirc_1$	$\bigcirc_0$
b.				$\bigcirc_1$	$\bigcirc_0$
c.				$\bigcirc_1$	$\bigcirc_0$
d.				$\bigcirc_1$	$\bigcirc_0$
e.				$\bigcirc_1$	$\bigcirc_0$
f.				$\bigcirc_1$	$\bigcirc_0$

26. **In the table below, to the best of your knowledge, list all of the opioid-specific <u>treatment strategies</u> that your state/territory delivered between May 1, 2018 and April 30, 2019 and the total number of people that received each strategy. Please indicate whether any of these strategies were a result of Opioid STR funding.**

	Treatment strategy	Total number of people that received the strategy (if able to obtain)	Was strategy implemented using Opioid STR funding? *SELECT ONE*	
			YES	NO

In the table below, indicate the population(s) that your state/territory targeted for your Opioid STR <u>prevention strategies, treatment, and/or recovery services</u> between May 1, 2018 and April 30, 2019. For example, if you targeted all pregnant women for a treatment intervention, you would select "Females"; you would not have to select all the possible race/ethnicity categories that might be pregnant. If, however, you targeted African American and Hispanic pregnant women, then you would select "Hispanic/Latinos" and "African Americans" as well.

(These categories are not mutually exclusive. Use your judgment to select all responses that describe your target population.)
