Re: Non-Substantive Modifications to the Information Collection Tool for the Alzheimer's Disease Supportive Services Program (ADSSP) Data Collection

Date: July 6, 2017

---

BACKGROUND:

On June 22, 2017 The Alzheimer's Disease Supportive Services Program (ADSSP) Data Collection was approved by OMB. The final approved collection instrument/tool which was uploaded into ROCIS did not include a revision made which included a "Hispanic" tabulation in the instrument/tool. This change was noted in the Supporting Statement that was approved by OMB. This revised tool has now been uploaded into ROCIS. Cortney Higgins of OMB's staff is aware of the non-substantive request being submitted.
