

## Justification for No Material/ Non-Substantive Change Request

The ATF requests approval to make the following changes to OMB 1140-0039:

- A. Changes to 3310.11A:
- Added row after brief incident description for the user to indicate whether any of the missing/stolen firearms being reported were National Firearms Act (NFA) weapons (check box) (pg. 1)
  - Added column for “Importer” within missing/stolen firearms description section so the user can enter the name of the importer of foreign made firearm lost or stolen (pg. 1 and on 3310.11A)
  - Updated “Important Notice,” first paragraph to mirror the exact verbiage in the official order
  - “Important Notice,” second paragraph, updated order number from 179.141 to 479.141, which was changed since last revision of Form 3310.11
  - Added definitions of NFA categories to assist the user in determining if any of the missing/stolen firearms are indeed NFA weapons (pg. 2)
  - Rearranged the Instructions section (pg. 2) to be more concise and in chronological order, making them more efficient for the user to read and follow;
- B. Addition of an optional Federal Firearms Licensee (FFL) Firearms Inventory Theft /Loss Continuation Sheet (ATF F 3310.11A), to provide additional space for FFLS record more stolen/lost firearms (as needed). The estimated burden for this collection already includes time taken to complete this optional Continuation Sheet.
