

**SUPPORTING STATEMENT FOR THE  
INFORMATION COLLECTION REQUIREMENTS OF THE  
STANDARD ON THE STORAGE AND HANDLING  
OF ANHYDROUS AMMONIA (29 CFR 1910.111)<sup>1</sup>  
OFFICE OF MANAGEMENT AND BUDGET  
(OMB) CONTROL NO. 1218-0208 (July 2017)**

**A. JUSTIFICATION**

**1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection. Attach a copy of the appropriate section of each statute and regulation mandating or authorizing the collection of information.**

The main purpose of the Occupational Safety and Health Act (OSH Act) is to “assure so far as possible every working man and woman in the Nation safe and healthful working conditions and to preserve our human resources” (29 U.S.C. 651). To achieve this objective, the OSH Act specifically authorizes “the development and promulgation of occupational safety and health standards” (29 U.S.C. 651). In addition, the OSH Act specifies that “[e]ach employer shall make, keep and preserve, and make available to the Secretary . . . such records . . . as the Secretary . . . may prescribe by regulation as necessary or appropriate for the enforcement of this Act . . .” (29 U.S.C. 657).

Section 6(b)(7) of the Act specifies that [a]ny standard promulgated under this subsection shall prescribe the use of labels or other appropriate forms of warning as are necessary to insure that workers are apprised of all hazards to which they are exposed, relevant symptoms and appropriate emergency treatment, and proper conditions and precautions of safe use or exposure. This provision goes on to state that “[t]he Secretary, in consultation with the Secretary of Health and Human Services, may by rule promulgated pursuant to section 553 of title 5, United States Code, make appropriate modifications in the foregoing requirements relating to the use of labels or other forms of warning . . . as may be warranted by experience, information, or medical or technological developments acquired subsequent to the promulgation of the relevant standard” (29 U.S.C. 655).

Under the authority granted by the OSH Act, the Occupational Safety and Health Administration (“OSHA” or “the Agency”) published the Anhydrous Ammonia Standard (the “Standard”; 29 CFR 1910.111). Paragraphs (b)(3) and (b)(4) of the Standard have paperwork requirements that apply to nonrefrigerated containers and systems, and refrigerated containers, respectively; employers use these containers and systems to store and transfer anhydrous ammonia in the workplace.

---

<sup>1</sup>The purpose of this Supporting Statement is to analyze and describe the burden hours and costs associated with provisions of this standard that contain paperwork requirements; this Supporting Statement does not provide information or guidance on how to comply with, or how to enforce, the standard.

# THE STORAGE AND HANDLING OF ANHYDROUS AMMONIA (29 CFR 1910.111)

1218-0208

July 2017

**2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the Agency has made of the information received from the current collection.**

Paragraph (b)(3) of the Standard specifies that containers and systems have nameplates if required, and that these nameplates “be permanently attached to the system (as specified by paragraph (b)(3)(ii)(j)) so as to be readily accessible for inspection . . . .” In addition, this paragraph requires that markings on containers and systems covered by paragraphs (c) (“Systems utilizing stationary, nonrefrigerated storage containers”), (f) (“Tank motor vehicles for the transportation of ammonia”), (g) (“Systems mounted on farm vehicles other than for the application of ammonia”), and (h) (“Systems mounted on farm vehicles for the application of ammonia”) provide information regarding nine specific characteristics of the containers and systems. Similarly, paragraph (b)(4) of the Standard specifies that refrigerated containers be marked with a nameplate on the outer covering in an accessible place which provides information regarding eight specific characteristics of the container.

The required markings ensure that employers use only properly designed and tested containers and systems to store anhydrous ammonia, thereby, preventing accidental release of, and exposure of workers to, this highly toxic and corrosive substance.

**3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also describe any consideration of using information technology to reduce burden.**

Employers may use any available technology to provide the required information.

**4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item A.2 above.**

The information collection requirements in the Standard are specific to each employer involved and no other source or agency duplicates these requirements or can make the required information available to OSHA (i.e., the required information is available only from employers).

**5. If the collection of information impacts small businesses or other small entities, describe any methods used to minimize burden.**

The information collection requirements specified by the Standard do not have a significant impact on a substantial number of small entities.

**6. Describe the consequence to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.**

Employers need to collect the required information only if it becomes unreadable because of equipment damage or use, or because it no longer represents the operational characteristics of the equipment. Any reduction in frequency would eliminate the requirements entirely.

**7. Explain any special circumstances that would cause an information collection to be conducted in a manner:**

THE STORAGE AND HANDLING OF ANHYDROUS AMMONIA (29 CFR 1910.111)

1218-0208

July 2017

- **Requiring respondents to report information to the agency more often than quarterly;**
- **Requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;**
- **Requiring respondents to submit more than an original and two copies of any document;**
- **Requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records for more than three years;**
- **In connection with a statistical survey that is not designed to produce valid and reliable results that can be generalized to the universe of study;**
- **Requiring the use of statistical data classification that has not been reviewed and approved by OMB;**
- **That includes a pledge of confidentiality that is not supported by authority established in statute or regulation that is not supported by disclosure and data security policies that are consistent with the pledge, or which unnecessarily impedes sharing of data with other agencies for compatible confidential use; or**
- **Requiring respondents to submit proprietary trade secret, or other confidential information unless the agency can prove that it has instituted procedures to protect the information's confidentiality to the extent permitted by law.**

No special circumstances exist that require employers to collect information using the procedures specified by this item. The requirements are within the guidelines set forth in 5 CFR 1320.5.

**8. If applicable, provide a copy and identify the date and page number of publication in the Federal Register of the agency's notice, required by 5 CFR 1320.8(d), soliciting comments on the information collection before submission to OMB. Summarize public comments received in response to that notice and describe actions taken by the agency in response to those comments. Specifically, address comments received on cost and hour burdens.**

**Describe efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, the clarity of instructions and recordkeeping, disclosure, or reporting format (if any), and on the data elements to be recorded, revealed, or reported.**

**Consultation with representatives of those from whom information is to be obtained or those who must compile records should occur at least once every three years -- even if the collection of information activity is the same as in prior periods. There may be circumstances that mitigate against consultation in a specific situation. These circumstances should be explained.**

Pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)), OSHA published a notice in the *Federal Register* on April 25, 2017 (82 FR 19087) soliciting comments on its proposal to extend the Office of Management and Budget's approval of the information collection requirements specified by the Standard on the Storage and Handling of Anhydrous (29 CFR part 1910.111) under Docket Number OSHA-2010-0050-0006. This notice was part of a preclearance consultation program that provided the general public and government agencies with an opportunity to comment. The Agency did not receive any comments in response to this notice.

**9. Explain any decision to provide any payment or gift to respondents, other than reenumeration of contractors or grantees.**

The Agency will not provide payments or gifts to the respondents.

**10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.**

The paperwork requirements specified by the Standard do not involve confidential information.

**11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private. This justification should include the reason why the agency considers the questions necessary, the specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.**

The paperwork requirements specified by the Standard do not involve sensitive information.

**12. Provide estimates of the hour burden of the collection of information. The statement should:**

- **Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. Unless directed to do so, agencies should not conduct special surveys to obtain information on which to base hour burden estimates. Consultation with a sample (fewer than 10) of potential respondents is desirable. If the hour burden on respondents is expected to vary widely because of differences in activity, size, or complexity, show the range of estimated hour burden, and explain the reasons for the variance. Generally, estimates should not include burden hours for customary and usual business practices.**
- **If this request for approval covers more than one form, provide separate hour burden estimates for each form and aggregate the hour burdens.**
- **Provide estimates of annualized cost to respondents for the hour burdens for collections of information, identifying and using appropriate wage-rate categories.**

### **Burden-Hour and Cost Determination**

The Agency adopted the mean hourly wage rates from the “*Occupational Employment Statistics, Occupational Employment and Wages, May 2016*,” Bureau of Labor Statistics, *U.S. Department of Labor*, <http://www.bls.gov/oes/current/oes510000.htm>. To account for fringe benefits, we used the fringe rate reported in BLS’ Employer Costs for Employee Compensation –March 2017, (ECEC) news release June 9, 2017 . BLS reported that for private industry, fringes accounted for 31.7 percent of total compensation and wages accounted for the remaining 68.3 percent. To calculate the loaded hourly wage for each occupation, we thus divide the mean hourly wage by 68.3 percent.” ( $17.88/.683 = \$26.18$ )

The Agency estimates that there are approximately 198,000 refrigerated and non-refrigerated anhydrous ammonia containers covered by the Standard. In the previous ICR, OSHA had discussions with a representative of the Fertilizer Institute (a leading manufacturer of this

THE STORAGE AND HANDLING OF ANHYDROUS AMMONIA (29 CFR 1910.111)

1218-0208

July 2017

equipment) informed the Agency that employers place about 1,100 units into service each year, and that manufacturers and suppliers of this equipment provide the markings required by paragraphs (b)(3) and (b)(4) of the Standard. Accordingly, during the three-year period covered by this Supporting Statement, employers would place about (3,300 = 1,100 x 3) new containers into service, for a total of 201,300 containers. OSHA notes that the 201,300 estimate is likely an overestimate since it does not take into account tanks going out of service.

While manufacturers and suppliers of this equipment provide the markings initially, employers must subsequently replace or revise some of these markings because they become unreadable due to equipment damage or use, or because they no longer represent the operational characteristics of the equipment. OSHA believes it very unlikely that new tanks would need to have replacement markings since the “new” tanks have the markings securely affixed. In this regard, OSHA assumes no burden for the 3,300 new tanks; however, the Agency estimates that each year employers will replace or revise 1 percent of the markings on the current 198,000 anhydrous ammonia containers or systems and that it will take a manufacturing worker, at a wage rate of \$26.18<sup>2</sup> an hour, 10 minutes (.17 hour) to perform this task on each container or system.

The estimated burden hours and cost associated with this provision are:

**Burden hours:** 198,000 containers x .01 x .17 hours = 337 hours

**Cost:** 337 hours x \$26.18= \$8,823

**13. Provide an estimate of the total annual cost burden to respondents or recordkeepers resulting from the collection of information. (Do not include the cost of any hour burden shown in Items 12 and 14.)**

There are no additional costs to the respondents other than their time.

**14. Provide estimates of annualized cost to the Federal government. Also, provide a description of the method used to estimate cost, which should include quantification of hours, operational expenses (such as equipment, overhead, printing, and support staff), and any other expense that would not have been incurred without this collection of information. Agencies also may aggregate cost estimates from Items 12, 13, and 14 in a single table.**

There is no cost to the Federal Government.

**15. Explain the reasons for any program changes or adjustments.**

The Agency is requesting an adjustment decrease of eight burden hours (from 345 hours to 337 hours). This decrease is due to a drop in the number of containers.

**16. For collections of information whose results will be published, outline plans for tabulation, and publication. Address any complex analytical techniques that will be used. Provide the time schedule for the**

THE STORAGE AND HANDLING OF ANHYDROUS AMMONIA (29 CFR 1910.111)

1218-0208

July 2017

**entire project, including beginning and ending dates of the collection information, completion of report, publication dates, and other actions.**

OSHA will not publish the information collected under 29 CFR 1910.111.

**17. If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons that display would be appropriate.**

OSHA lists current valid control numbers in §§1910.8, 1915.8, 1917.4, 1918.4, and 1926.5 and publishes the expiration date in the Federal Register notice announcing OMB approval of the information collection requirements. (See 5 CFR 1320.3(f)(3).) OSHA believes that this is the most appropriate and accurate mechanism to inform interested parties of these expiration dates.

**18. Explain each exception to the certification statement.**

OSHA is not requesting an exception to the certification statement.

**B. COLLECTION OF INFORMATION EMPLOYING STATISTICAL METHODS**

This Supporting Statement does not contain any collection of information requirements that employ statistical methods.
