

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

FOR FURTHER INFORMATION CONTACT:

Ronda Thompson by email at: Ronda.Thompson@faa.gov.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 2120-0730.

Title: Certification of aircraft and Airmen for the Operation of Light-Sport Aircraft.

Form Numbers: None.

Type of Review: Renewal of an information collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on November 1, 2016 (81 FR 75899). There were no comments. 14 CFR 91.417 requires the owners and operators of light-sport aircraft to maintain a record of the current status of applicable safety directives and transfer that information at the time of sale of the aircraft. The information is used by FAA safety inspectors in determining whether required maintenance actions have been accomplished on aircraft. The information is also used when investigating accidents.

Respondents: Approximately 1,000 operators/owners.

Frequency: On occasion.

Estimated Average Burden per Response: 2 hours.

Estimated Total Annual Burden: 2,133 hours.

Issued in Washington, DC, on February 1, 2017.

Ronda L. Thompson,

FAA Information Collection Clearance Officer, Performance, Policy & Records Management Branch, ASP-110.

[Docket No. FRA-2017-0002-N-5]

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation.

ACTION: Notice and request for comments.

SUMMARY: Under the Paperwork Reduction Act of 1995 (PRA) and its implementing regulations, FRA seeks approval of the proposed information collection activities listed below. Before submitting these information collection requests (ICR) to the Office of Management and Budget (OMB) for approval, FRA is soliciting public comment on specific aspects of the activities identified below.

DATES: Comments must be received no later than May 15, 2017.

ADDRESSES: Submit written comments on the information collection activities by mail to either: Mr. Robert Brogan, Information Collection Clearance Officer, Office of Railroad Safety, Regulatory Analysis Division, RRS-21, Federal Railroad Administration, 1200 New Jersey Avenue SE., Mail Stop 25, Washington, DC 20590; or Ms. Kim Toone, Information Collection Clearance Officer, Office of Information Technology, RAD-20, Federal Railroad Administration, 1200 New Jersey Avenue SE., Mail Stop 35, Washington, DC 20590. Commenters requesting FRA to acknowledge receipt of their respective comments must include a self-addressed stamped postcard stating, "Comments on OMB Control Number 2130-XXXX," (the relevant OMB control number for each ICR is listed below) and should also include the title of the ICR. Alternatively, comments may be faxed to (202) 493-6216 or (202) 493-6497, or emailed to Mr. Brogan at Robert.Brogan@dot.gov, or Ms. Toone at Kim.Toone@dot.gov. Please refer to the assigned OMB control number in any correspondence submitted. FRA will summarize comments received in response to this notice in a subsequent notice and include them in its information collection submission to OMB for approval.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Brogan, Information Collection Clearance Officer, Office of Railroad Safety, Regulatory Analysis Division, RRS-21, Federal Railroad Administration, 1200 New Jersey

Avenue SE., Mail Stop 25, Washington, DC 20590 (telephone: (202) 493-6292) or Ms. Kim Toone, Information Collection Clearance Officer, Office of Information Technology, RAD-20, Federal Railroad Administration, 1200 New Jersey Avenue SE., Mail Stop 35, Washington, DC 20590 (telephone: (202) 493-6132). (These telephone numbers are not toll free.)

SUPPLEMENTARY INFORMATION:

The PRA, 44 U.S.C. 3501-3520, and its implementing regulations, 5 CFR part 1320, require Federal agencies to provide 60-days' notice to the public to allow comment on information collection activities before seeking OMB approval of the activities. See 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1), 1320.10(e)(1), 1320.12(a). Specifically, FRA invites interested parties to comment on the following summary of proposed information collection activities regarding: (1) Whether the information collection activities are necessary for FRA to properly execute its functions, including whether the activities will have practical utility; (2) the accuracy of FRA's estimates of the burden of the information collection activities, including the validity of the methodology and assumptions used to determine the estimates; (3) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (4) ways for FRA to minimize the burden of information collection activities on the public by automated, electronic, mechanical, or other technological collection techniques and other forms of information technology (e.g., permitting electronic submission of responses). See 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1).

FRA believes that soliciting public comment will promote its efforts to reduce the administrative and paperwork burdens associated with the collection of information that Federal regulations mandate. In summary, FRA reasons that comments received will advance three objectives: (1) Reduce reporting burdens; (2) ensure that it organizes information collection requirements in a "user-friendly" format to improve the use of such information; and (3) accurately assess the resources expended to retrieve and produce information requested. See 44 U.S.C. 3501.

Below is a brief summary of currently approved information collection activities that FRA will submit for OMB renewed or revised clearance as the PRA requires:

Title: Hours of Service Regulations.
OMB Control Number: 2130-0005.

Abstract: On August 12, 2011, FRA amended its hours of service recordkeeping regulations, to add a new 49 CFR part 228, subpart F, providing substantive hours of service requirements, including maximum on-duty periods, minimum off-duty periods, and other limitations, for train employees (e.g., locomotive engineers and conductors) providing commuter and intercity rail passenger transportation. See 76 FR 50359. The regulations require railroads to evaluate work schedules for risk of employee fatigue and implement measures to mitigate the risk, and to submit to FRA for its approval the relevant schedules

and fatigue mitigation plans. This regulation also made corresponding changes to FRA's hours of service recordkeeping regulations to require railroads to keep hours of service records and report excess service to FRA in a manner consistent with the new requirements. This regulation was mandated by the Rail Safety Improvement Act of 2008 (Pub. L. 110-432, Division A). FRA uses the information collected under this rule to ensure compliance with the requirements of the regulation. In particular, FRA uses the information collected as a result of new subpart F to verify the train employees of commuter

and intercity passenger railroads do not exceed maximum on-duty periods, abide by minimum off-duty periods, and adhere to other limitations in this regulation, to enhance rail safety and reduce the risk of accidents/incidents caused or contributed to by train employee fatigue.

Title: Reflectorization of Freight Rolling Stock.
OMB Control Number: 2130-0566.
Abstract: FRA issued this regulation to mandate the reflectorization of freight rolling stock (using retroreflective material on freight cars and locomotives) to enhance the visibility of trains to reduce the number and severity of accidents at highway-rail grade crossings where visibility was a contributing factor. See 70 FR 144, Jan. 3, 2005. FRA uses the information

collected to verify that the railroad person responsible for the car reporting mark is notified after the required visual inspection when the freight equipment has less than 80 percent of the required retroreflective sheeting present, undamaged, or unobscured. Further, FRA uses the information collected to verify that the required locomotive records of retroreflective sheeting defects found after inspection are kept in the locomotive cab or in a railroad accessible electronic database FRA can

access upon request. Finally, FRA uses the information collected to confirm that railroads/car owners meet the prescribed standards for the inspection and maintenance of the required retroreflective material.

Title: Railroad Safety Appliance Standards.
OMB Control Number: 2130-0594.
Abstract: FRA amended the regulations for safety appliance arrangements on railroad equipment on April 28, 2011. See 76 FR 23714. The amendments are intended to promote the safe placement and securement of safety appliances on rail equipment by establishing a process for the review and

approval of existing industry standards. This process permits railroad industry representatives to request approval of existing industry standards for the safety appliance arrangements on newly constructed railroad cars, locomotives, tenders, or other rail vehicles, in lieu of the provisions in 49 CFR part 231. This special approval process enhances railroad safety by allowing FRA to consider technological advancements and ergonomic design standards for new car construction. It ensures that modern rail equipment complies with applicable statutory and safety-critical regulatory requirements related to safety appliances while providing the

flexibility to efficiently address safety appliance requirements on new designs for railroad cars, locomotives, tenders, or other rail vehicles. FRA uses the information collected under this regulation to better serve the goal of adapting to changes in modern rail car design while facilitating statutory and regulatory compliance.
