SUPPLEMENTARY INFORMATION:

I. Background

The NSF maintains the "Fellowships and Other Awards"; "Principal Investigator/Proposal File and Associated Records"; "Reviewer/Proposal File and Associated Records"; "Reviewer/Fellowship and Other Awards File and Associated Records"; and "Project Participant File." These changes more adequately describe the systems and update the routine uses. All revised system notices are reprinted in their entirety.

NSF is also amending its standard routine uses for all NSF systems of records. The changes made to the standard routine uses now proposed will bring the total number of standard routine use to eleven. Most of the eleven standard routine uses previously existed as routine uses within each individual NSF SORN.

NSF-12 contains records on fellowship applicants; nominees for

fellowships by an institution on behalf of the nominee; and nominees for other specific individual awards. Fellowship awards are usually administered by the applicant or the nominee's home institution. An amendment to this system notice was last published in the **Federal Register** on August 20, 2007, effective on September 30, 2007, 72 FR 46520–46521.

NSF-50 contains records on research and other proposals jointly submitted by individual applicants (principal investigators) and their home academic or other institutions. NSF-50 includes submitted proposals, review materials, and when an award is made, records concerning the administration of the award, and awardee project reports submitted to NSF. An amendment to this system notice was last published in the **Federal Register** on August 20, 2007, effective on September 30, 2007, 72 FR 46520–46521.

NSF-51 is a subsystem of NSF-50 and contains information about those who review proposals for NSF including the reviewer's name, proposal title and its identifying number, and other related material. The system enables program offices to reference specific reviewers and maintain appropriate files for use in evaluating applications for grants or other support. An amendment to this system notice was last published in the **Federal Register** on August 20, 2007, effective on September 30, 2007, 72 FR 46520–46521.

NSF-54 contains similar records about reviewers of applications as the system of records for "Fellowships and Other Awards" (NSF-12). An amendment to this system notice was last published in the **Federal Register** on August 20, 2007, effective on September 30, 2007, 72 FR 46520–46521.

NSF-64, Project Participant File, contains information on certain participants who work on NSF-funded projects, other than principal investigators or project directors covered by NSF-50. An amendment to this system notice was last published in the **Federal Register** on August 20, 2007, effective on September 30, 2007, 72 FR 46520–46521.

The amendments to these systems will be effective as proposed at the end of the comment period (February 2, 2015), unless modified by a subsequent notice to incorporate comments received from the public.

II. Privacy Act

The Privacy Act of 1974, as amended (5 U.S.C. 552a), embodies fair information practice principles in a statutory framework governing the

means by which Federal Agencies collect, maintain, use, and disseminate individual's personal information. A "system of records" is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined as a U.S. citizen or lawful permanent resident. As a matter of policy, NSF extends administrative Privacy Act protections to all individuals. Individuals may request access to their own records that are maintained in a system of records in the possession or control of NSF by complying with NSF Privacy Act regulations, 45 CFR part 613.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses of their records, and to assist individuals to find such records within the agency. Below are descriptions of the following NSF systems: NSF-12, Fellowships and Other Awards; NSF-50: Principal Investigator/Proposal File and Associated Records; NSF-51, Reviewer/Proposal File and Associated Records; NSF-54, Reviewer/Fellowships and Other Awards File and Associated Records; and NSF-64, Project Participant File.

In accordance with 5 U.S.C. 552a(r), NSF has provided a report of this system of records to the Office of Management and Budget; the Chairman, Senate Committee on Governmental Affairs; and the Chairman, House Committee on Government Reform and Oversight.

III. Public Participation

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment including your personal identifying information may be made publicly available at any time.

Dated: December 16, 2014.

Sandra Evans,

Privacy Act Officer, National Science Foundation.

5. *Response to an Actual or Suspected Compromise or Breach of Personally Identifiable Information.* Information from a system may be disclosed to appropriate agencies, entities, and persons when (a) NSF suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised; (b) NSF has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by NSF or another agency or entity) that rely upon the compromised information; and (c) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist with NSF's efforts to respond to the suspected or confirmed compromise

and prevent, minimize, or remedy such harm.

6. *Courts.* Information from a system may be disclosed to the Department of Justice or other agencies in the event of a pending court or formal administrative proceeding, when records are relevant to that proceeding, for the purpose of representing the government, or in the course of presenting evidence, or they may be produced to parties or counsel involved in the proceeding in the course of pre-trial discovery.

10. *Disclosure When Requesting Information.* Information from a system may be disclosed to Federal, State, or local agencies which maintain civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary, to obtain information relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

11. *To the news media and the public when:* (1) A matter has become public knowledge, (2) the NSF Office of the Director determines that disclosure is necessary to preserve confidence in the integrity of NSF or is necessary to demonstrate the accountability of NSF's officers, employees, or individuals covered by this system, or (3) the Office of the Director determines that there exists a legitimate public interest in the disclosure of the information, except to the extent that the Office of the Director determines in any of these situations that disclosure of specific information in the context of a particular case would

constitute an unwarranted invasion of personal privacy.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-295, 50-304, and 72-1037; NRC-2014-0199]

ZionSolutions, LLC.; Zion Nuclear Power Station, Units 1 and 2; Independent Spent Fuel Storage Installation

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an exemption in response to a request submitted by ZionSolutions on June 25, 2014, for its general license to operate an independent spent fuel storage installation (ISFSI) at the Zion Nuclear Power Station (ZNPS). The exemption would permit ZionSolutions to load NAC International, Inc. (NAC), Modular Advanced Generation Nuclear All-purpose Storage (MAGNASTOR®) casks (Certificate of Compliance (CoC) No. 1031) in a manner different than permitted by any amendment to the MAGNASTOR® CoC. ZionSolutions is currently loading MAGNASTOR® storage casks and maintains that relief from requirements provides flexibility in operations, minimizes equipment runtime and repair, and minimizes personnel dose.

DATES: Notice of issuance of exemption given on December 22, 2014.
