Statistical Methodology

Survey Procedures: These estimates were based on inventory, birth, and price estimates as published in NASS cattle, hog, and agricultural prices reports, as well as information on inshipments and marketings obtained from other sources. The NASS inventory reports are based on probability surveys of producers. All producers, regardless of size, had a chance to be in the survey. Large operations were sampled more heavily than small operations. Since all operations raising cattle or hogs are not included in the sample, survey estimates are subject to sampling variability. At the National level, this variability, as measured by the relative standard error, is about 1 percent for cattle and 1 percent for hogs. Survey results are also subject to non-sampling errors such as omissions, duplication, and mistakes in reporting, recording, and processing the data. The effects of these errors can not be measured directly, but they are minimized through rigid quality controls in the data collection process and a careful review of all reported data for consistency and reasonableness. Readers are referred to the Survey Procedures section in the following NASS reports for further information *Quarterly Hogs and Pigs* released December 23, 2016, *Cattle* released January 31, 2017, and *Agricultural Prices* released February 28, 2017.

Estimation Procedures: Estimation procedures for prices, beginning and ending inventories and calf and pig crop estimates are defined in the Estimation Procedures section of the reports referenced above. This report provides a balance sheet for each species. The sum of inventory on hand at the beginning of the year plus births and inshipments equals the sum of marketings, farm slaughter, deaths, and inventory on hand at the end of the year.

Revision Policy: Revisions to previous estimates are made to improve current estimates. For both species, previous year estimates of inshipments, marketings, farm slaughter, and deaths are subject to revision when the current year estimates are made. Estimates are also reviewed after data from the Department of Agriculture five-year Census of Agriculture are available. No revisions are made after that date.

Terms and Definitions

Cash Receipts: Receipts from marketings and any sale of farm-slaughtered meats. For hogs and pigs, includes an allowance for feeder pig outshipments. United States prices received for cattle and calves and hogs and pigs were published in *Agricultural Prices*, released February 28, 2017.

Farm Slaughter: Animals slaughtered on farms primarily for home consumption. Excludes custom slaughter for producers at commercial establishments.

Gross Income: Sum of cash receipts and value of home consumption.

Inshipments: Livestock shipped into States for feeding or breeding. Excludes animals brought in for immediate slaughter.

Marketings: Includes animals for slaughter market and younger animals shipped to other States for feeding and breeding purposes. Excludes interfarm sales within the same State and farm slaughter. Number of head marketed includes all custom slaughter, but live weight marketed, shown in pounds, excludes custom slaughter consumed on farms where produced.

Production: Includes total live weight of animals marketed, farm slaughter, and custom slaughter consumed on farms where produced, minus live weight of inshipments, with an adjustment for any increase or decrease in live weight of inventory.

Value of Home Consumption: Total value of on-farm slaughter and custom slaughter consumed on the farm where produced.
