

BACKYARDS NEEDED FOR RESEARCH!

Be part of a Lyme Disease
prevention study!

Participants will receive gift cards for
completing surveys.

ABOUT US

We want to find better ways to prevent Lyme disease and other tickborne infections. This study will help us determine if tickborne diseases can be prevented with a single, targeted pesticide application and rodent bait-boxes in residential yards.

WANT TO ENROLL?

Take our eligibility survey at
www.backyardtickstudy.org
to tell us about your yard!

ABOUT YOU

- You are at least 18 years of age;
- Have a home with a yard;
- Have 3 or more people living in your home;
- Will allow a single, targeted pesticide application and rodent bait-boxes in your backyard;
- Will complete short surveys about your yard and your exposure to ticks.

...and you dislike ticks like this one!
