Subject: RE: NVDRS OMB package-close to complete

Good Morning,

NVDRS doesn't contain PII so the Privacy Act is not applicable since it is only applicable when data is retrieved by a personal identifiable. A privacy impact assessment (PIA) is required for all systems; even when there is no PII. Please let us know if you have any questions or need any additional information.

Very Respectfully,

11 Describe the purpose of the system.

The National Violent Death Reporting System (NVDRS) is an incident-based system designed to capture data on violent deaths (suicides, homicides, deaths of undetermined intent, and unintentional firearm deaths) in a relational database. This system allows data from law enforcement reports, death certificates, and coroner/medical examiner reports to be combined into one cohesive data base allowing a variety of public health professionals and decision-makers to analyze and understand the nature of and trends of violence in the United States. NVDRS is the only state-based surveillance (reporting) system that pools data on violent deaths from multiple sources into a usable, anonymous database.

12 Describe the type of information the system will collect, maintain (store), or share. (Subsequent questions will identify if this information is PII and ask about the specific data elements.)
