Use of HMIS Data	Number of Grantees	Percent
Not being utilized	15	36%
To report Annual Report Survey/PATH data	20	48%
To monitor PATH providers	12	29%
To monitor PATH consumer participation in services or housing	10	24%
To monitor PATH consumer outcomes	9	21%
To report to other State or Federal agencies	7	17%
To plan PATH services or activities	7	17%
Other	2	5%

Table 8 provides the table shell for reporting of results of multivariate models for three sample outcomes for the PATH Enhanced Evaluation Component. The columns represent models and the rows represent the independent variables in each model. The cells corresponding to each independent variable, contain the regression coefficient of the variable and its standard deviation.

Table 8 Table Shell for Reporting the Results of Multivariate Models for Three Sample Outcomes.
