DATE OF REQUEST: January 11, 2019

SUB AGENCY (I/C): HHS/AHRQ

TITLE: Questionnaire and Data Collection Testing, Evaluation, and Research for the Agency for Healthcare Research and Quality - Insurance Plans Purchased Individually

GENERIC CLEARANCE UNDER OMB#: 0935-0124 **EXP. DATE:** 11/30/2020

ABSTRACT: The purpose of this request is to conduct cognitive interviews to test the ability of respondents to accurately provide a set of requested documentation about their insurance coverage (e.g., their plan's Summary of Benefits and Coverage (SBC)) during a MEPS Household Component interview. Further, the study aims to assess the ability to link information from the materials provided by the respondent to publicly available information about the details on their coverage. For example, AHRQ will assess whether information that is available on standard insurance cards can be used to retrieve detailed information about an individual's insurance policy. Lastly, the study will assess the level of increased burden that is placed on respondents when asking them to locate and produce the requested documentation to determine whether such a request will diminish their willingness to participate in MEPS. This study will target individuals who hold insurance plans they purchased individually (i.e. not provided by an employer, and not purchased from a marketplace/exchange). The findings will be used to design potential enhancements to the 2020 fielding of the MEPS Household Component.

This research has the following goal:

1. Assess the feasibility of implementing the collection of health policy coverage and benefits information for insurance plans purchased individually during the MEPS Household Component interview.
