1.4 Definition of Population Included in the Measure

Definition of Population Included in the Measure

Collapse

Definition of Denominator *

Select all that apply (Must select at least one)

- Denominator includes Medicaid population
- Denominator includes CHIP population (e.g. pregnant women.)
- Denominator includes Medicare and Medicaid Dually-Eligible population
- Other

Specify *

Does this denominator represent your total measure eligible population as defined by the Technical Specifications for this measure? *

- Yes
- No

Explain which populations are excluded and why *

Specify Total Measure Eligible Population *

Figure 4: Definition of Population Included in the Measure

1.5 Definition of Population Included in the Measure, cont.

Which delivery systems are represented in the Denominator? *

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

<input checked="" type="checkbox"/> Fee-for-Service	<p>Percentage of total state FFS population represented *</p> <input type="text"/> The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.
<input checked="" type="checkbox"/> Primary Care Case Management (PCCM)	<p>Percentage of total state PCCM population represented *</p> <input type="text"/> The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.
<input checked="" type="checkbox"/> Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)	<p>Number of Health Plans *</p> <input type="text"/> <p>Percentage of total state MCO/PIHP population represented *</p> <input type="text"/> The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.
<input checked="" type="checkbox"/> Integrated Care Models (ICM)	<p>Percentage of total state ICM population represented *</p> <input type="text"/> The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.
<input checked="" type="checkbox"/> Other	<p>Describe *</p> <input style="width: 100%; height: 40px;" type="text"/> <p>Percentage of total other population represented *</p> <input type="text"/> The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50. <p>If applicable, list the number of Health Plans represented</p> <input type="text"/>

Figure 5: Definition of Population Included in the Measure, cont.

1.6 Performance Measure - Path 1

Performance Measure Collapse

Among women ages 21 to 44 at risk of unintended pregnancy, the percentage that:

1. Were provided a most effective or moderately effective method of contraception.
2. Were provided a long-acting reversible method of contraception (LARC).

Enter rate values to one decimal place (XX.X). If your rate ends in .0, note that the .0 will not be retained on the screen and the whole number will be displayed instead.

Rate 1: Most effective or moderately effective method of contraception

Ages 21-44

Please explain why data was not entered for this numerator/denominator/rate set *

Character count: 0/4000

Rate 2: Long-acting reversible method of contraception (LARC)

Ages 21-44

Please explain why data was not entered for this numerator/denominator/rate set *

Character count: 0/4000

Figure 6: Performance Measure - Path 1

1.7 Performance Measure – Path 2

Performance Measure Collapse

Among women ages 21 to 44 at risk of unintended pregnancy, the percentage that:

1. Were provided a most effective or moderately effective method of contraception.
2. Were provided a long-acting reversible method of contraception (LARC).

Enter rate values to one decimal place (XX.X). If your rate ends in .0, note that the .0 will not be retained on the screen and the whole number will be displayed instead.

Rate 1: Most effective or moderately effective method of contraception

Ages 21-44

Numerator	Denominator	Rate
0	0	0

Rate 2: Long-acting reversible method of contraception (LARC)

Ages 21-44

Numerator	Denominator	Rate
0	0	0

Figure 7: Performance Measure - Path 2

1.8 Deviations from Measurement Specification

Deviations from Measurement Specifications Collapse

Did your calculation of the measure deviate from the measure specification in any way? *

Yes
 No

Please select and explain the deviation(s)

Rate 1: Most effective or moderately effective method of contraception

Ages 21-44

Numerator

Denominator

Other

Rate 2: Long-acting reversible method of contraception (LARC)

Ages 21-44

Numerator

Denominator

Other

1.9 Combined Rate(s) from Multiple Reporting Units

Combined Rate(s) from Multiple Reporting Units Collapse

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? *

Yes
 No

If yes, indicate whether the state-level rate is weighted

Must select one

The rates are weighted based on the size of the measure-eligible population for each reporting unit

The rates are weighted based on another weighting factor

The rates are not weighted

Figure 9: Combined Rate(s) from Multiple Reporting Units

1.10 Optional Measure Stratification

Note: Same N/D/R sets are displayed under each of the stratification categories

Optional Measure Stratification Collapse

If this measure is also reported by additional classifications/sub-categories, e.g. racial, ethnic, sex, language, disability status, or geography, complete the following as applicable.

Enter rate values to one decimal place (XX.X). If your rate ends in .0, note that the .0 will not be retained on the screen and the whole number will be displayed instead.

Check all that apply

- Race (Non-Hispanic)
 - White
 - Black or African American
 - American Indian or Alaska Native

Rate 1: Most effective or moderately effective method of contraception
