1.4 Performance Measure - Path 1

Performance Measure

Percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed. Two rates are reported.

Initiation Phase: Percentage of children ages 6 to 12 as of the Index Prescription Start Date (IPSD) with an ambulatory prescription dispensed for ADHD medication who had one follow-up visit with practitioner with prescribing authority during the 30-day initiation Phase.

Continuation and Maintenance (C&M) Phase: Percentage of children ages 6 to 12 as of the IPSD with an ambulatory prescription dispensed for ADHD medication who remained on the medication for at least 210 days and who, in addition to the visit in the Initiation Phase, had at least two follow-up visits with a practitioner within 270 days (9 months) after the Initiation Phase ended.

Enter rate values to one decimal place (XX.X). If your rate ends in .0, note that the .0 will not be retained on the screen and the whole number will be displayed instead.

Initiation Phase

Please explain why data was not entered for this numerator/denominator/rate set *

Character count: 0/4000

Continuation and Maintenance (C&M) Phase

Please explain why data was not entered for this numerator/denominator/rate set *

Character count: 0/4000
