1.4 Date Range

News Tasks (13) Records Reports **Actions** 

Date Range Collapse

For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a "look-back period" before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the "look-back period."

Start Date

<input type="text" value="Select Month"/>	<input type="text" value="Select Year"/>
Month	Year

End Date

<input type="text" value="Select Month"/>	<input type="text" value="Select Year"/>
Month	Year

1.5 Definition of Population Included in the Measure

Definition of Population Included in the Measure

Collapse

Definition of Denominator *

- Denominator includes CHIP (Title XXI) population only
- Denominator includes Medicaid (Title XIX) population only
- Denominator includes CHIP and Medicaid (Title XIX)

If the denominator is a subset of the definition selected above, please further define the denominator, and indicate the number of children excluded

Does this denominator represent your total measure-eligible population as defined by the Technical Specifications for this measure? *

- Yes
- No

What is the sample size? *

What is the measure-eligible population? *

Which delivery systems are represented in the Denominator? *

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure-eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

- Fee-for-Service

- Primary Care Case Management (PCCM)

- Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)

- Integrated Care Models (ICM)

- Other

Explain which populations are excluded and why *

Percentage of total state FFS population represented *

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

Percentage of total state PCCM population represented *

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

Number of Health Plans *

Percentage of total state MCO/PIHP population represented *

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

Percentage of total state ICM population represented *

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

Describe *

Percentage of total other population represented *

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

If applicable, list the number of Health Plans represented

Figure 5: Definition of Population Included in the Measure

1.6 Performance Measure - Screenshot 1

Performance Measure Collapse

Percentage of children and adolescents ages 12 months to age 19 who had a visit with a primary care practitioner (PCP). Four separate percentages are reported:

- Children ages 12 to 24 months and 25 months to age 6 who had a visit with a PCP during the measurement year
- Children ages 7 to 11 and adolescents ages 12 to 19 who had a visit with a PCP during the measurement

Enter rate values to one decimal place (XX.X). If your rate ends in .0, note that the .0 will not be retained on the screen and the whole number will be displayed instead.

Ages 12-24 Months

1.10 Combined Rate(s) from Multiple Reporting Units

News Tasks (13) Records Reports Actions

 Appian

Combined Rate(s) from Multiple Reporting Units
Collapse

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? *

- Yes
- No

If yes, indicate whether the state-level rate is weighted

- The rates are weighted based on the size of the measure-eligible population for each reporting unit
- The rates are weighted based on another weighting factor

Describe the other weighting factor:

- The rates are not weighted

Figure 10: Combined Rate(s) from Multiple Reporting Units
