Date Range

Collapse

For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a "look-back period" before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the "look-back period."

1.5 Definition of Population Included in the Measure

Definition of Population Included in the Measure

Collapse

Definition of Denominator *

- Denominator includes CHIP (Title XXI) population only
- Denominator includes Medicaid (Title XIX) population only
- Denominator includes CHIP and Medicaid (Title XIX)

If the denominator is a subset of the definition selected above, please further define the denominator, and indicate the number of children excluded

Does this denominator represent your total measure-eligible population as defined by the Technical Specifications for this measure? *

- Yes
- No

Which delivery systems are represented in the Denominator? *

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure-eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

Fee-for-Service

Percentage of total state FFS population represented *

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

Primary Care Case Management (PCCM)

Percentage of total state PCCM population represented *

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)

Number of Health Plans *

Percentage of total state MCO/PIHP population represented *

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

Integrated Care Models (ICM)

Percentage of total state ICM population represented *

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

Other

Describe *

Percentage of total other population represented *

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

If applicable, list the number of Health Plans represented

Figure 5: Definition of Population Included in the Measure

1.6 Performance Measure

Performance Measure Collapse

Percentage of beneficiaries ages 12 to 17 screened for clinical depression on the date of the encounter using an age appropriate standardized depression screening tool, and if positive, a follow-up plan is documented on the date of the positive screen.

Enter rate values to one decimal place (XX.X). If your rate ends in .0, note that the .0 will not be retained on the screen and the whole number will be displayed instead.

Numerator	Denominator	Rate
0	0	0

Figure 6: Performance Measure

1.7 Deviations from Measure Specifications- Screenshot 1

Deviations from Measure Specifications Collapse

Did your calculation of the measure deviate from the measure specification in any way? *

Yes
 No

Please select and explain the deviation(s)

Ages 12-17

Numerator Explain *

Denominator Explain *

Other Explain *

Figure 7: Deviations from Measure Specifications – Screenshot 1

1.9 Combined Rate(s) from Multiple Reporting Units

News Tasks (3) Records Reports **Actions** Appian

Combined Rate(s) from Multiple Reporting Units Collapse

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? *

Yes

No

If yes, indicate whether the state-level rate is weighted

The rates are weighted based on the size of the measure-eligible population for each reporting unit

The rates are weighted based on another weighting factor

Describe the other weighting factor:

The rates are not weighted

Figure 9: Combined Rate(s) from Multiple Reporting Units
