For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a "look-back period" before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the "look-back period."

# 1.5 Definition of Population Included in the Measure

**Definition of Population Included in the Measure**
Collapse

**Definition of Denominator\***

Denominator includes CHIP (Title XXI) population only  
 Denominator includes Medicaid (Title XIX) population only  
 Denominator includes CHIP and Medicaid (Title XIX)

**If the denominator is a subset of the definition selected above, please further define the denominator, and indicate the number of children excluded**

**Does this denominator represent your total measure-eligible population as defined by the Technical Specifications for this measure?\***

Yes  
 No

**What is the sample size?\***

**What is the measure-eligible population?\***

**Which delivery systems are represented in the Denominator?\***

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure-eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.</p>
