Date Range [Collapse](#)

For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a "look-back period" before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the "look-back period."

1.5 Definition of Population Included in the Measure

Definition of Population Included in the Measure

Definition of Denominator *

Denominator includes CHIP (Title XXI) population only
 Denominator includes Medicaid (Title XIX) population only
 Denominator includes CHIP and Medicaid (Title XIX)

If the denominator is a subset of the definition selected above, please further define the denominator, and indicate the number of children excluded

Does this denominator represent your total measure-eligible population as defined by the Technical Specifications for this measure? *

Yes
 No

What is the sample size? *

What is the measure-eligible population? *

Which delivery systems are represented in the Denominator? *

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure-eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

Performance Measure +/-

Percentage of enrolled children ages 6 to 9 at elevated risk of dental caries (i.e. "moderate" or "high") who received a sealant on a permanent first molar tooth within the reporting year.

Enter rate values to one decimal place (XXX). If your rate ends in .0, note that the .0 will not be retained on the screen and the whole number will be displayed instead.
