Statewide Longitudinal Data System (SLDS) Survey 2017

Instructions:

Please fill out the form below based on the current status of each specified element or capability in your SLDS, not the status of elements or capabilities of systems that are not linked to your SLDS. While we recognize there are various levels of linking, when we use the term "link", we are referring to an established technology solution that allows for data to be brought together in a replicable and useful way.

If your state has or is in the process of building more than one SLDS (e.g., K12 and P20W), your responses should reflect the cumulative status and attributes encompassing both systems. A P20W system encompasses information across multiple sectors. It is inclusive of not only K12 data, but could include early learning, postsecondary, and/or workforce data. **Therefore, you may have to consult other state agency or department counterparts to complete this survey in its entirety (early learning, postsecondary, workforce, etc.) The data that are collected inform our on-going evaluation and technical assistance efforts, and might be used to assess state needs to guide future grant round agendas**. Thank you for completing this survey with accurate responses.

The feature status options are:
- **Not Planned** - The state is currently not planning to include that element/capability in its SLDS. "Not Planned" should also be marked for items that are not applicable to your state SLDS at this time (legislative prohibitions, "unadopted" interest, etc.);
- **Planned** - The state intends to include this element/capability in its SLDS and has a documented plan and funding source to implement, but implementation work has not begun;
- **In Progress** - The state is currently building or implementing this element/capability as part of its SLDS, but it is not yet fully operational; and
- **Operational** - This element/capability is fully functional and available for its intended users.
