

Attachment J. Source of Respondents for Each Wave of Data Collection (Annualized)

	Screener	Wave A	Wave B	Wave C	Wave D	Wave E
General Population						
Adults in U.S.	25,000	---	---	---	---	---
Total Adults	25,000	---	---	---	---	---
Smokers						
ABS (Fresh/Replenishment)	---	4,100	---	400	400	400
ABS (Recontact)	---	---	2,400	2,000	2,000	2,000
ABS Total	---	4,100	2,400	2,400	2,400	2,400
KP (Fresh/Replenishment)	---	2,400	---	400	700	700
KP (Recontact)	---	---	1,600	1,200	900	900
KP Total	---	2,400	1,600	1,600	1,600	1,600
Total Smokers	---	6,500	4,000	4,000	4,000	4,000
Nonsmokers						
ABS (Fresh/Replenishment)	---	1,000	525	525	525	525
ABS (Recontact)	---	500	975	975	975	975
ABS Total	---	1,500	1,500	1,500	1,500	1,500
KP (Fresh/Replenishment)	---	1,000	---	125	125	125
KP (Recontact)	---	---	500	375	375	375
KP Total	---	1,000	500	500	500	500
Total Nonsmokers	---	2,500	2,000	2,000	2,000	2,000

Note: On an annualized basis, we will recruit an estimated 6,500 smokers for Wave A and anticipate that approximately 4,000 (62%) of those will participate in the Wave B follow-up. We anticipate maintaining a total smoker sample size of approximately 4,000 through continued follow-ups and sample replenishment at each of the remaining waves (Waves C, D and E). Approximately 2,500 nonsmokers will be recruited for the Wave A survey and we anticipate that 2,000 (75%) of those will be retained for the Wave B follow-up. A sample of approximately 2,000 nonsmokers will be maintained through continued follow-ups and sample replenishment at each remaining wave (Waves C, D and E). We anticipate that approximately 25,000 individuals annually will be screened to yield the initial Wave A sample of 6,500 smokers and 2,500 nonsmokers.
