

Institutional Review Board Certification

Expedited Approval

Principal Investigator/Project Director: Erin Parker, Elizabeth Burns (CDC)/Bess Welch

NORC Department: Public Health

IRB Protocol Number: 17.04.11

Project Number: 7984

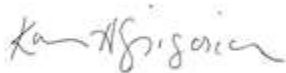

Protocol Title: Test Predictability of Falls Screening Tools

Expiration Date: 4/17/2018

This certifies that the research protocol and consent documents described above have been approved under the expedited review procedure in accordance with HHS Regulations at 45 CFR 46.110, under expedited review categories 5 and 7, by the NORC Institutional Review Board (IRB00000967), under its Federalwide Assurance #FWA00000142, which is valid through July 10, 2018.

Any amendments or other changes to this protocol must be submitted for review by the IRB, and all adverse events must be reported to the IRB.

The IRB has approved your research for a period of one year. To avoid a lapse in IRB approval, please submit your continuing review materials to the IRB **at least 2 weeks prior to the expiration date listed above**. Although the IRB will provide reminders to you about renewing your study's approval as you near the expiration date, it is the responsibility of the principal investigator and project director to ensure that IRB approval does not lapse and that continuing review materials are submitted before a study's approval lapses.

Karen H. Grigorian, IRB Chair
