NRMN Faculty Mentor Core Follow-up Survey
Revised 7.31.17

NRMN Annual Follow-up Survey

You have previously participated in a program associated with the National Research Mentoring Networks (NRMN), perhaps through mentoring, training regarding mentorship or grant-writing, or affiliated programs such as IRACD or ROCC.

NRMN programs are part of a large National Institutes of Health (NIH) funded initiative for those pursuing biomedical, behavioral, clinical, and social science research careers. This effort, the NIH Diversity Program Consortium (DPC), has been tasked with understanding what programs and strategies benefit those interested in these careers.

The University of California, Los Angeles (UCLA) is collecting information about these programs on behalf of the Consortium and NIH.

NRMN has provided UCLA your name and contact information because you have participated in activities that are part of the NIH Diversity Program Consortium's work. All of the information you provide will be protected and secured to the extent permitted by law.

Through this survey, we will gain understanding of your professional activities, including any mentoring/coaching practices, research, scholarly productivity, and other academic activities.

Public reporting burden for this collection of information is estimated to average 25 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: NIH, Project Clearance Branch, 6705 Rockledge Drive, MSC 7974, Bethesda, MD 20892-7974, ATTN: PRA (0925-0747). Do not return the completed form to this address.

A mentor can be either someone who is more experienced (or senior) than you or someone who is at a level similar to you (a “peer”). **It can also be someone who serves as an academic “coach.”**

A mentee is someone who receives guidance or assistance from a mentor. A mentee can be someone less experienced (or junior) than you or someone who is your peer.

A mentoring relationship can be formal (with established responsibilities and perhaps arranged by your institution) or informal.

2. Have you ever regularly mentored students, **post-docs or fellows**, junior researchers, junior faculty, or peers on biomedical career or research issues?

If you do not have any mentees who are from under-represented groups, please indicate the two mentees with whom you work most closely on research.

Weblink will not allow anyone to view their names or email addresses. The information will be used to email a request to these mentees to complete a brief survey regarding their mentored experience.

Mentees' names and emails are only available to our research office if the mentees respond to the email request by going to the website and completing the survey. Their information will be deleted from the system after 3 months if they do not respond to the requests to participate.
