

Background and Rationale

At the National Institutes of Health (NIH), the Office of Disease Prevention (ODP) is the lead office responsible for assessing, facilitating, and stimulating research in disease prevention and health promotion. We are also charged with disseminating the results of this research to improve public health. To enhance the quality of prevention research supported by the NIH, the ODP seeks to identify individuals with appropriate methodological and content expertise who might serve as reviewers of research applications submitted to NIH that have relevance to the field of prevention.

This survey asks you to report your level of methodological and content expertise across five areas related to prevention research:

- Study Design Topics
- Research Methods
- Content Topics
- Settings
- Populations

As part of the survey questionnaire, you will be asked to create a user account. The survey also provides an option for you to have the following shared with the ODP and others at the National Institutes of Health, including the Center for Scientific Review:

- Your contact information
- Areas of expertise
- Willingness to serve as a reviewer

Your participation in the Prevention Research Expertise Survey is strictly voluntary and there are no consequences for choosing not to participate. If you chose to share your information, you may be asked to review applications, either on an ad hoc basis or as part of a study section.

The survey itself should take about 20 minutes to complete.

Thank you for your help to enhance the quality of prevention research supported by NIH.

Privacy Act Notification Statement *

Collection of this information is authorized under 42 U.S.C. 217a, 241, 282(b)(6), 284a, and 288. 48 CFR Subpart 15.3 and Subpart 42.15. The primary use of the Expertise in Prevention Science Survey is to enhance the quality of prevention research supported by the Department of Health & Human Services in part, by helping to identify individuals as potential reviewers of prevention research grant applications submitted to the Office of Disease Prevention. Your survey responses will be disclosed to DHHS staff, particularly those who work at the NIH in the Division of Program Coordination, Planning, and Strategic Initiatives and the Center for Scientific Review. Submission of your personal information is voluntary, however, in order for us to consider your qualifications, you should complete all fields.

- I have read the above statement and agree.
- I do not agree.

Public reporting burden for this collection of information is estimated to average 20 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: NIH, Project Clearance Branch, 6705 Rockledge Drive, MSC 7974, Bethesda, MD 20892-7974, ATTN: PRA (0925-xxxx). Do not return the completed form to this address.

NIH Review Experience *

- I am currently an appointed member of a review group.
- I currently review applications on an ad hoc basis.
- I am not currently reviewing applications, but would be interested in doing so on an ad hoc basis.
- I am not currently reviewing applications but would be interested in being an appointed member of a study section.
- I am not interested in reviewing applications submitted to NIH at the current time.
- I am not interested in reviewing applications submitted to NIH.

Methodological Fields of Expertise

For each of the **STUDY DESIGN TOPICS** below, choose only one experience level.

In the last 10 years, I have...

None: No practical experience with this design

Basic: Less than 3 years of practical experience with this design

Skilled: 3-5 years of practical experience working with this design

Expert: A minimum of 5 years of practical experience with this design; comfortable teaching others to work with this design

Study Design Topics	None	Basic	Skilled	Expert
Adaptive intervention designs	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Adaptive research designs	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Clinical trial designs	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Cohort-sequential (accelerated longitudinal) designs	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Cross-over designs	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Cross-sectional designs	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Effectiveness and implementation studies	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Thank You

Thank you for taking part in the survey. Your participation enhances the quality of prevention research supported by NIH.

Based on your skill set and interest in reviewing funding applications, NIH may follow up with you to request your assistance. Your information will not be shared with anyone outside of NIH. To facilitate follow-up, ODP may send you an email every 24-36 months, asking you to return to this site and update your skills and experience level.

At the National Institutes of Health (NIH), the Office of Disease Prevention (ODP) is the lead office responsible for assessing, facilitating, and stimulating research in disease prevention and health promotion. We are also charged with disseminating the results of this research to improve public health. Learn more at <http://prevention.nih.gov>.

Thank you,
David M. Murray, Ph.D.
Associate Director for Prevention
Director, Office of Disease Prevention

Invite Your Colleagues

We ask that you support this effort to further the direction of the prevention research by sharing this survey with colleagues.
