## **1. BACKGROUND**

The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA) makes it more important than ever for children and their custodial parents to receive the child support they are entitled to, as the Act places time limits on the receipt of welfare assistance. To assist in this effort, the child support enforcement requirements of PRWORA mandate that each state employ quarterly matching of delinquent noncustodial parents to the accounts maintained at financial institutions. This handbook establishes the Specifications to conduct this matching.

## **2. INTRODUCTION**

All data match filers should use these Specifications for all reports filed. For a general explanation of the institutions and financial assets subject to data match reporting, refer to the federal Office of Child Support Enforcement (OCSE) Action Transmittal 98-07 and 98-29, and the Data match law of the states in which you do business.

## **3. PARTICIPATION**

Check with your state for available reporting options. Many states offer two reporting methods. In those states, each financial institution subject to the data match laws must inform the state which of the two reporting methods it will use to report data match information. You will find a description of each method in this handbook.

## **4. METHOD ONE – ALL ACCOUNTS METHOD**

Institutions may elect to present to the state a file identifying all open accounts by April 30 of each year and quarterly thereafter. Certain states may require you to file only one All Account file in the first quarter of the year, followed by quarterly updates of accounts opened and closed. Please check with your state for this information.

Institutions electing Method One may also elect to treat their required Form 1099 filing as part of their obligation under the Data Match program, making changes in their 1099 filing to meet data match requirements. These institutions are then required to send a supplemental report containing account information not included in the 1099 file.

## **5. METHOD TWO – MATCHED ACCOUNTS METHOD**

Institutions may elect to match a file presented by the state, not more than quarterly, against all accounts maintained at that institution. The file will be sent to the person designated by the institution. It is to be returned with the Match File or No Match report after processing. Institutions electing this option must report information required on all accounts at the institution maintained on the state's Inquiry File. You must deliver these reports within 30-45 days of receiving the Inquiry File.

## 6. REPORTING AGENTS

Many financial institutions contract with reporting agents (also known as service agents, service providers, or transmitters) for Internal Revenue Service Form 1099 reporting. As these Specifications are similar to the Form 1099 format, these reporting agents may be used to report data match information. An institution electing Method Two that designates a reporting agent to receive, process, and report data match information on its behalf must inform the state of this designation. This is to guarantee the confidentiality of the information on the state Inquiry File.

Anytime an institution wants the state to send the Inquiry File to a recipient whose Tax Identification Number (TIN) is different from the institution, the state must be informed.

## 7. EXCHANGING DATA MATCH INFORMATION

These Specifications apply specifically to the files and reports named below:

- **Account Files** – Files submitted to the state listing all accounts of the financial institution under the option offered by Method One – All Accounts Method. This includes the supplemental file from institutions that elected to include their annual Form 1099 filing as part of their data match reporting. (For further information, please refer to Section B.4, “Combined 1099/Data Match Filing.”)
- **Account Update Files** – Files sent to the state reporting new, changed, or recently closed accounts which supplement or update information previously filed under Method One – All Accounts Method.
- **Inquiry File** – Files sent from the state to financial institutions electing to report under Method Two – Matched Accounts Method. This file contains a list of persons which the institution will match against its records.
- **Match Files** – The files sent to the state of accounts matched under Method Two – Matched Accounts Method, where the state supplied the institution with an Inquiry File.

All files sent to the state under the Data Match program contain only three types of records, which are defined in this publication.

1. Financial Institution Record
2. Account Owner Record
3. “T” Total Record

We wrote these Specifications to allow institutions to copy and change existing Form 1099 programs, rather than create an entirely new layout. To minimize programming, certain Form 1099 fields are permitted in these Specifications, and are designated as “Optional.”

## 8. COMMON DATA MATCH ERRORS

The state encourages filers to verify the content of their data match files to ensure the accuracy of the data. This may eliminate the need for states to return files for correction. This is especially important to those who have reports prepared by a reporting agent.

Filing institutions will receive the rejected files back with an explanation for the rejection. The institution should make the appropriate corrections and resend the file as soon as possible.

The following were frequently encountered problems experienced by the Massachusetts Department of Revenue in the first year of its Financial Institution Data Match operation.

- **Form 1099 reports submitted in place of Method One Data Match reports**

Although the magnetic media specifications for 1099 and data match reporting are similar, you cannot file a 1099 report in place of a data match report, as there are important differences. An institution may elect to combine 1099 and data match filing, but only after electing to do so on the BMRS-I, Data Match Election Form. Even so, the 1099 file must be modified as instructed in this handbook.

- **Non-interest bearing accounts omitted or excluded**

Although such accounts may be exempt from IRS 1099 reporting, these accounts are not excludable under the laws governing data match reporting.

- **Transmittal Report not included with Data Match file**

This slows the processing of your file.

- **Transmitter TINXID omitted on Transmittal**

- **“A” Record: The institution or money market fund TIN/FID omitted, positions 7-15**

Only numerals should appear in these positions. Hyphens and spaces between digits are also common errors.

- **Levy service mailing address incorrect or omitted, positions 131-210**

The levy service address may be different from that entered on the IRS 1099 report or the general street address.

- **“B” Record: Account Balance omitted, positions 351-357**

## **9. WHERE TO SEND DATA MATCH FORMS AND FILES**

Consult your state data match reporting site for this address. Method Two institutions reporting matched accounts to different states should use Appendix D., “Data Match FIPS Code Directory,” to determine where to file their report.

## **10. SPECIAL DELIVERY**

Financial institutions are advised to send data match CD-ROMs by courier mail to ensure timely receipt.

## **11. WHERE TO GET HELP**

If you have any questions, regarding these specifications, please call the MSFIDM Help Desk at (410) 277-9312 or email them at [fidm@ssa.gov](mailto:fidm@ssa.gov)

## B.4 Combined 1099/Data Match Filing

Where permitted, institutions making the election to report under Method One and include data match account information with their annual Form 1099 filing must change their 1099 “A” and “B” Records. Because Form 1099 specifications can vary from state to state, the format below may not be suitable for your institution. You must contact your state for further information on this filing option.

### B.4.1 “A” RECORD

The character “A” (Account File) must be entered in position 371. Otherwise, positions 1-750 should be filled as required in IRS Publication 1220 for Form 1099.

### B.4.2 “B” RECORD

Positions 6-662 should be filled as required in IRS Publication 1220. However, the following additional fields must be added to the “B” Record in the positions 663-684, where the IRS permits states to add “Special Data Entries.” With the exception of the Account Status Indicator defined below, these fields and their description are found in the complete Method One “B” Record layout, but their location will be different.

**B.4.3 “T” RECORD**

There are no modifications to be made to the Form 1099 “T” Record.

After filing combined information by the February 28 due date, a data match supplemental report will be due April 30. This will include all accounts not included on the 1099 file (such as: non-interest bearing accounts), and all accounts opened and closed since January 1. An institution may file a complete All Accounts file in place of this supplemental report.

## C. METHOD TWO – THE MATCHED ACCOUNTS METHOD

### C.1 The Inquiry File: Specifications for Files to be Given to Financial Institutions for Data Matching

Financial Institutions (or their Reporting Agents) electing to perform the matching under Method Two, the Matched Accounts Method, will receive from the State an “Inquiry File” containing a list of persons to be matched.

Files the state sends to institutions for matching purposes must match against all open accounts the institution maintains and all account owners, including secondary owners. Note that institutions must match this file against accounts not normally considered for 1099 reporting, including non-interest bearing accounts and accounts earning less than \$10.00 in interest or dividends.

Inquiry Files contain only three kinds of records:

1. “D” A record identifying the year and month the state created the file
2. “I” The basic inquiry record, identifying the person to be matched
3. “T” The total record showing the number of inquiry records on this file

### **C.3 How to Report No Matches Found**

Those filing under Method Two may have no matches to report after comparing their accounts against the state Inquiry File. Reporting agents and institutions that process Data Match Method Two in-house each have separate No Match directions.

For a reporting agent filing reports for more than one institution, follow these instructions:

4. If the agent finds no matches for any institution, it may file a report by entering “No Matches” on a completed Inquiry/Response File Transmission Form. Attach a list containing every institution name, TIN, and the total number of accounts compared against the Inquiry File for each.
5. Agents reporting both matches and no matches must include a complete “A” and “T” Record on the Match File for every institution it compares against the Inquiry File. Do not omit those institutions with no matches, but enter zeroes in the appropriate positions of the “T” Record. An institution that has been omitted may find itself in violation of data match filing requirements.
6. Agents reporting for a single financial institution that files a Method Two report for itself, and finds no matches after comparing its accounts to the Inquiry File, may file a No Match Report by entering "No Matches" on a completed transmittal report. Include the total number of accounts compared against the Inquiry File.
