

PRIVACY THRESHOLD ANALYSIS (PTA)

This form is used to determine whether a Privacy Impact Assessment is required.

Please use the attached form to determine whether a Privacy Impact Assessment (PIA) is required under the E-Government Act of 2002 and the Homeland Security Act of 2002.

Please complete this form and send it to your component Privacy Office. If you do not have a component Privacy Office, please send the PTA to the DHS Privacy Office:

Senior Director, Privacy Compliance
The Privacy Office
U.S. Department of Homeland Security
Washington, DC 20528
Tel: 202-343-1717

PIA@hq.dhs.gov

Upon receipt from your component Privacy Office, the DHS Privacy Office will review this form. If a PIA is required, the DHS Privacy Office will send you a copy of the Official Privacy Impact Assessment Guide and accompanying Template to complete and return.

A copy of the Guide and Template is available on the DHS Privacy Office website, www.dhs.gov/privacy, on DHSConnect and directly from the DHS Privacy Office via email: pia@hq.dhs.gov, phone: 202-343-1717.

SPECIFIC PTA QUESTIONS

1. Reason for submitting the PTA: Renewal PTA

The Non-Disaster Grant Management System (ND Grants) is a web-based system intended to provide the Federal Emergency Management Agency (FEMA) and its stakeholders with a system that supports the grants management lifecycle.

ND Grants includes:

- Administrative Organization Modules
- Application Submission
- Grants.gov Interface
- Award Package Creation and Review

External Organization Management and Task Assignment Services

ND Grants has interfaces to both FEMA and non-FEMA systems. The interfaces include the FEMA Service Oriented Architecture Generic Support System (SOA GSS) which provides business process (BPM) and business rule management (BRM) as a service to the ND Grants application, the FEMA Generic Financial Interface (GFI) which provides an intermediary to the Integrated Financial Management Information System (IFMIS) FEMAs core accounting system, FEMAs Integrated Security Authentication and Access Control system (ISAAC) which provides user authentication and role management as a service to the ND Grants Application, and The Department of Health and Human Services (HHS)'s Grants.gov web application which provides Funding Opportunity advertisement and application services. PII information flows from Grants.gov to ND Grants, and the remaining required data elements are updated by grantees in ND Grants.

This iteration of ND Grants, ND Grants 3.0, utilizes two middleware products: Business Process Manager (BPM) and Operational Decision Manager (ODM), which replace the need for custom code within the application for workflow and business rules, respectively. Both BPM and ODM are hosted on FEMA's Service Oriented Architecture (SOA).

² DHS defines personal information as "Personally Identifiable Information" or PII, which is any information that permits the identity of an individual to be directly or indirectly inferred, including any information that is linked or linkable to that individual, regardless of whether the individual is a U.S. citizen, lawful permanent resident, visitor to the U.S., or employee or contractor to the Department. "Sensitive PII" is PII, which if lost, compromised, or disclosed without authorization, could result in substantial harm, embarrassment, inconvenience, or unfairness to an individual. For the purposes of this PTA, SPII and PII are treated the same.

4(d) If yes, please describe the uses of the SSNs within the project, program, or system:	NA

³ When data is sent over the Internet, each unit transmitted includes both header information and the actual data being sent. The header identifies the source and destination of the packet, while the actual data is referred to as the payload. Because header information, or overhead data, is only used in the transmission process, it is stripped from the packet when it reaches its destination. Therefore, the payload is the only data received by the destination system.

⁴ PII may be shared, received, or connected to other DHS systems directly, automatically, or by manual processes. Often, these systems are listed as "interconnected systems" in Xacta.

<p>FEMA's Non-Disaster Grant Management System (ND Grants) is a web-based system that provides the agency and its stakeholders with a system that supports the grants management lifecycle. ND Grants is a privacy sensitive system because it collects PII from members of the public in the form of contact type information collected from points of contacts for non-disaster grants.</p> <p>ND Grants is covered by the DHS/FEMA/PIA-013 Grant Management Programs PIA and is listed in its Appendix A as a covered system.
