General – Please do not combine product lines. If the information is not directly available from your records, **reasonable estimates are acceptable.**

The construction project types listed below are general to your industry. Select the project types that apply to your establishment. On the next screen, you will report the specific construction products and services related to the construction projects you select. If you have revenue from other sources not listed, you will have the opportunity to report them later.

At-risk construction project management revenue should be reported with the specific construction project associated with those management services. For example, if at-risk construction project management is for office buildings, then include the management revenue with the project for office buildings. However, at-fee project management services should be reported in the specific project for construction project management services.

Of the \$,000.00 of Sales, Shipments, Receipts, or Revenue reported in **Item 5**, what was the value for each product or service?

General – Please do not combine product lines. If the information is not directly available from your records, **reasonable estimates are acceptable.**

Below are the products and services associated with the construction projects you previously selected. If you have revenue from sources not listed, describe and report them in the "All other sales, shipments, receipts, or revenue from this establishment" section at the end of this question.

At-risk construction project management revenue should be reported with the specific construction services associated with those management services. For example, if at-risk construction project management is for office buildings, then include the management revenue with the constructions services for office buildings. However, at-fee project management services should be reported in the specific product lines for construction project management services.

Construction and Construction Services Section – Report only the main activities including the type of buildings, structures, or facilities contracted to construct or work on by this establishment in the reporting year in which this establishment received receipts only. If you worked on more than one type of building or structure in a multipurpose complex, report separately for each building or type of structure. However, if you worked on a building that had more than one purpose, i.e. office, residential, or commercial, classify this building by its major purpose.

- **New Construction** is the original construction work done on a project including all finishing work on the original building or structure. Land development work on the site and demolition of existing structures are included in new construction.
- **Additions, Alterations, or Reconstruction** is construction work which adds to the value of useful life of an existing building or structure, or which adapts a building or structure to a new or different use. Included are "major replacements" of building systems such as the installation of a new roof or heating system, and the resurfacing of streets or highways. Exclude activities such as the repair of a hole in a roof or the routine patching of highways and streets, which are classified as "maintenance and repair work".
- **Maintenance and Repair Work** is incidental construction work that keeps a property in ordinary working condition. Exclude trash and snow removal, lawn maintenance, and janitorial services, which are considered Services sector activities.

ITEM 22: DETAIL OF SALES, SHIPMENTS, RECEIPTS OR REVENUE

Of the \$,000.00 of Sales, Shipments, Receipts, or Revenue reported in **Item 5**, what products and services were included?

Select ALL that apply.

General – Please do not combine product lines. If the information is not directly available from your records, **reasonable estimates are acceptable.**

The construction project types listed below are general to your industry. Select the project types that apply to your establishment. On the next screen, you will report the specific construction products and services related to the construction projects you select. If you have revenue from other sources not listed, you will have the opportunity to report them later.

At-risk construction project management revenue should be reported with the specific construction project associated with those management services. For example, if at-risk construction project management is for office buildings, then include the management revenue with the project for office buildings. However, at-fee project management services should be reported in the specific project for construction project management services.

Of the \$,000.00 of Sales, Shipments, Receipts, or Revenue reported in **Item 5**, what was the value for each product or service?

General – Please do not combine product lines. If the information is not directly available from your records, **reasonable estimates are acceptable.**

Below are the products and services associated with the construction projects you previously selected. If you have revenue from sources not listed, describe and report them in the "All other sales, shipments, receipts, or revenue from this establishment" section at the end of this question.

At-risk construction project management revenue should be reported with the specific construction services associated with those management services. For example, if at-risk construction project management is for office buildings, then include the management revenue with the constructions services for office buildings. However, at-fee project management services should be reported in the specific product lines for construction project management services.

Construction and Construction Services Section – Report only the main activities including the type of buildings, structures, or facilities contracted to construct or work on by this establishment in the reporting year in which this establishment received receipts only. If you worked on more than one type of building or structure in a multipurpose complex, report separately for each building or type of structure. However, if you worked on a building that had more than one purpose, i.e. office, residential, or commercial, classify this building by its major purpose.

- **New Construction** is the original construction work done on a project including all finishing work on the original building or structure. Land development work on the site and demolition of existing structures are included in new construction.
- **Additions, Alterations, or Reconstruction** is construction work which adds to the value of useful life of an existing building or structure, or which adapts a building or structure to a new or different use. Included are "major replacements" of building systems such as the installation of a new roof or heating system, and the resurfacing of streets or highways. Exclude activities such as the repair of a hole in a roof or the routine patching of highways and streets, which are classified as "maintenance and repair work".
- **Maintenance and Repair Work** is incidental construction work that keeps a property in ordinary working condition. Exclude trash and snow removal, lawn maintenance, and janitorial services, which are considered Services sector activities.

ITEM 22: DETAIL OF SALES, SHIPMENTS, RECEIPTS OR REVENUE

Of the \$,000.00 of Sales, Shipments, Receipts, or Revenue reported in **Item 5**, what products and services were included?

Select ALL that apply.

General – Please do not combine product lines. If the information is not directly available from your records, **reasonable estimates are acceptable.**

The construction project types listed below are general to your industry. Select the project types that apply to your establishment. On the next screen, you will report the specific construction products and services related to the construction projects you select. If you have revenue from other sources not listed, you will have the opportunity to report them later.

At-risk construction project management revenue should be reported with the specific construction project associated with those management services. For example, if at-risk construction project management is for office buildings, then include the management revenue with the project for office buildings. However, at-fee project management services should be reported in the specific project for construction project management services.

Of the \$,000.00 of Sales, Shipments, Receipts, or Revenue reported in **Item 5**, what was the value for each product or service?

General – Please do not combine product lines. If the information is not directly available from your records, **reasonable estimates are acceptable.**

Below are the products and services associated with the construction projects you previously selected. If you have revenue from sources not listed, describe and report them in the "All other sales, shipments, receipts, or revenue from this establishment" section at the end of this question.

At-risk construction project management revenue should be reported with the specific construction services associated with those management services. For example, if at-risk construction project management is for office buildings, then include the management revenue with the constructions services for office buildings. However, at-fee project management services should be reported in the specific product lines for construction project management services.

Construction and Construction Services Section – Report only the main activities including the type of buildings, structures, or facilities contracted to construct or work on by this establishment in the reporting year in which this establishment received receipts only. If you worked on more than one type of building or structure in a multipurpose complex, report separately for each building or type of structure. However, if you worked on a building that had more than one purpose, i.e. office, residential, or commercial, classify this building by its major purpose.

- **New Construction** is the original construction work done on a project including all finishing work on the original building or structure. Land development work on the site and demolition of existing structures are included in new construction.
- **Additions, Alterations, or Reconstruction** is construction work which adds to the value of useful life of an existing building or structure, or which adapts a building or structure to a new or different use. Included are "major replacements" of building systems such as the installation of a new roof or heating system, and the resurfacing of streets or highways. Exclude activities such as the repair of a hole in a roof or the routine patching of highways and streets, which are classified as "maintenance and repair work".
- **Maintenance and Repair Work** is incidental construction work that keeps a property in ordinary working condition. Exclude trash and snow removal, lawn maintenance, and janitorial services, which are considered Services sector activities.

ITEM 22: DETAIL OF SALES, SHIPMENTS, RECEIPTS OR REVENUE

Of the \$,000.00 of Sales, Shipments, Receipts, or Revenue reported in **Item 5**, what products and services were included?

Select ALL that apply.

General – Please do not combine product lines. If the information is not directly available from your records, **reasonable estimates are acceptable.**

The construction project types listed below are general to your industry. Select the project types that apply to your establishment. On the next screen, you will report the specific construction products and services related to the construction projects you select. If you have revenue from other sources not listed, you will have the opportunity to report them later.

At-risk construction project management revenue should be reported with the specific construction project associated with those management services. For example, if at-risk construction project management is for office buildings, then include the management revenue with the project for office buildings. However, at-fee project management services should be reported in the specific project for construction project management services.

Of the \$,000.00 of Sales, Shipments, Receipts, or Revenue reported in **Item 5**, what was the value for each product or service?

General – Please do not combine product lines. If the information is not directly available from your records, **reasonable estimates are acceptable.**

Below are the products and services associated with the construction projects you previously selected. If you have revenue from sources not listed, describe and report them in the "All other sales, shipments, receipts, or revenue from this establishment" section at the end of this question.

At-risk construction project management revenue should be reported with the specific construction services associated with those management services. For example, if at-risk construction project management is for office buildings, then include the management revenue with the constructions services for office buildings. However, at-fee project management services should be reported in the specific product lines for construction project management services.

Construction and Construction Services Section – Report only the main activities including the type of buildings, structures, or facilities contracted to construct or work on by this establishment in the reporting year in which this establishment received receipts only. If you worked on more than one type of building or structure in a multipurpose complex, report separately for each building or type of structure. However, if you worked on a building that had more than one purpose, i.e. office, residential, or commercial, classify this building by its major purpose.

- **New Construction** is the original construction work done on a project including all finishing work on the original building or structure. Land development work on the site and demolition of existing structures are included in new construction.
- **Additions, Alterations, or Reconstruction** is construction work which adds to the value of useful life of an existing building or structure, or which adapts a building or structure to a new or different use. Included are "major replacements" of building systems such as the installation of a new roof or heating system, and the resurfacing of streets or highways. Exclude activities such as the repair of a hole in a roof or the routine patching of highways and streets, which are classified as "maintenance and repair work".
- **Maintenance and Repair Work** is incidental construction work that keeps a property in ordinary working condition. Exclude trash and snow removal, lawn maintenance, and janitorial services, which are considered Services sector activities.
