

SUPPORTING STATEMENT – PART A
Nuclear Test Personnel Review Forms (0704-0447)

A. JUSTIFICATION

1. Need for the Information Collection

The Defense Threat Reduction Agency (DTRA) is a Department of Defense (DoD) combat support agency that serves as executive agent for the Nuclear Test Personnel Review (NTPR) Program. The NTPR Program serves military personnel and DoD civilian employees who participated in U.S. atmospheric nuclear testing (1945-1962), with the occupation forces of Hiroshima and Nagasaki, Japan, or were prisoners of war in Japan at the conclusion of World War II. The NTPR Program assists these military and civilian participants, supports the Department of Veterans Affairs (VA) and Department of Justice (DOJ) in responding to radiogenic disease compensation claims, and provides information to organizations responsible for studies concerning the health effects of ionizing radiation. For DTRA to fulfill this role, it must collect information from veterans and former DoD civilian employees. DTRA Forms 150, 150-A, 150-B, and 150-C serve as the collection vehicle.

Authority to collect this information is provided by PL 98-542 (The Veterans' Dioxin and Radiation Exposure Compensation Standards Act) which appointed the Defense Nuclear Agency (now DTRA) as the Executive Agent for the NTPR Program. It also required the Secretary of Defense to publish guidelines (see 32 CFR 218, "Guidance for the Determination and Reporting of Nuclear Radiation Dose for DoD Participants in the Atmospheric Nuclear Test Program") describing DoD's process for generating radiation dose estimates. Overarching authorities are 38 U.S.C. 1112 and 1154 (Veterans' Benefits); and 42 U.S.C. 2210 (DOJ Radiation Exposure Compensation).

2. Use of the Information

The NTPR Program has collected information via postal correspondence and telephonic conversations from former DoD employees since the late 1970's. This information has primarily been used in support of radiogenic disease claims filed with VA and DOJ. In addition, this information has been used in radioepidemiology studies performed by the National Research Council, Institute of Medicine, and now Vanderbilt University. These studies were frequently mandated by public law.

The respondents to this collection include former DoD employees, veterans, or their family members ranging from those that participated in atomic testing following WWII to underground testing participants until 1992. Due to the age of some personnel records or lack of documentation, this collection may be required to help determine the

history of each individual's time in service during the event they may be claiming to be a part of.

All parts of the collection are mailed to the respondents with a self-addressed stamped envelope for mailing of the completed form, along with a cover letter explaining the purpose of the form. All forms include Agency Disclosure Notices. The respondents are asked to answer the questions concerning their service to the best of their recollection. If the respondent fails to return the collection, we will attempt to contact them and receive as much of the information over the phone. All phone conversations are transcribed on a call log and placed in our system database. When returned, the collection is added to the respondent's case file and used as research material to help us determine the circumstance and verification of the information in which the respondent is claiming. Without this collection, we may not be able to fully document a respondent's whereabouts, actions, job description, or event which would not only slow down our response time considerably but may result in some respondents not receiving the medical attention they so rightly deserve. There are no other invitations or communications sent to the respondents associated with this information collection.

3. Use of Information Technology

0% of this collection is collected electronically. Although DTRA's NTPR Program maintains an elaborate website (<http://www.dtra.mil/Home/Nuclear-Test-Personnel-Review/>), the majority of the respondents are in their 70's and 80's and are not comfortable with web-based data collection or lack any access to such systems. Unless a complete secure web-based option was developed to minimize the sending of personal information via electronic mail, there are not enough respondents to warrant the cost. Once collected, data is maintained by DTRA as digitized PDF documents associated with a structured query language, relational database.

4. Non-Duplication

Some of this information may have already been collected by VA, DOJ, or the National Archives and Records Administration. Consequently, the NTPR Program first checks these sources so as to assure non-duplication of information collection.

5. Burden on Small Business

This information collection does not impose a significant economic impact on a substantial number of small businesses or entities.

6. Less Frequent Collection

Less frequent collection is not possible. This is a one-time collection effort (per respondent) for an individual to support processing of their radiogenic disease compensation claim.

7. Paperwork Reduction Act Guidelines

This collection of information does not require collection to be conducted in a manner inconsistent with the guidelines delineated in 5 CFR 1320.5(d)(2).

8. Consultation and Public Comments

PART A: PUBLIC NOTICE

A 60-day notice for the collection published on Thursday, July 13, 2017. The 60-Day FRN citation is volume 82, No. 49, FRN pages 32348. No comments were received during the 60-day Comment Period.

PART B: CONSULTATION

The NTPR Program deals directly with respondents or their representatives regarding the collection of information by mailing these forms directly to them. As noted in the response to question 3, if any questions arise, NTPR Program staff contact the respondent by phone to assist them. Once a form is returned and the respondent's case completed, additional consultation is not required. No additional consultation apart from soliciting public comments through the 60-Day Federal Register Noticed was conducted for this submission.

9. Gifts or Payment

No payments or gifts are being offered to respondent as an incentive to participate in the collections

10. Confidentiality

The information is collected and maintained in accordance with the federal requirements for control of privacy act material. Access to data both hardcopy and electronic is restricted to authorized staff on a need-to-know basis. Hardcopy and electronic data is maintained in controlled physical spaces, and at specified DoD levels of data protection. Records are retained for 75 years after termination of the case. Paper and microfiche records are collected in official disposal containers (burn-bags DTRA, and certified records disposal containers (contract service) at NTPR's offsite contract sites). With regard to magnetic tape (or hard disk drives) bulk demagnetizers are used to clean

the disks/tape before they are turned over to DTRA logistics for disposal. Electronic files are transferred to NARA when no longer required.

A Privacy Act Statement is required and is provided on each form of the collection distributed to the respondents.
