Comment:	cdc annot be trusted to collect staitstics on any area at all. they are a sneaky agency that tries to cover up everything. they do not respond to the public at all and call the public names and try to make the public look lazy or stupid. i find that disguwsting in a federal agency that is paid by taxpayrs who work to pay their salries. this agency cannot be trusted to gather statistics. it doesnt want to give us honest staistics. it wants to propagandize and push its own agenda,
-----------------	---

which is to make sure every body in this nation is injected with 60 doses of various vaccines of their choosing. they are not honest with the public. they dont make sure the public understands that when they get the flu shot they are being injected with green monkey cells, or dog cells, or mercury, or aluminum or egg cells, etc. they just lie to the public and say its safe. well the fact is it isnt safe for everybody because every body is different and reacts differnt to vaccines, just as they do to medicines. this agency is a horror to behold. it cant be trusted. it needs to be shut down. its grade for its work is f minus. i dont want schools to be in charge of making decisinos on whether somebodyh is sick with this or that. certainly diagnosis is a very very difficult thing so to take what some person says when they call upin the monring and says johnny is sick and uses the word "flu" that is not scientific collection at all. this entire job should never be done. it is the collection of fake information. fake fake fraudulent informaiton. shut it down totally. *👤
