

Project LAUNCH School Survey: Key Information Requested

Multi-site Evaluation of Project LAUNCH

Information Requested in the School Survey

Your school or early childhood education (ECE) program has agreed to participate in the **multi-site evaluation of Project LAUNCH** (Linking Actions for Unmet Needs in Children’s Health). As part of this study, we ask that a school administrator or early childhood education (ECE) program director fill out the **School Survey**, which collects information about **mental health consultations, suspensions, and expulsions**.

The school administrator or ECE program director may need to contact other individuals or review records in order to answer some of the questions in the survey. **Our goal in providing you with this form is to reduce the burden of participation by enabling you to gather requested information prior to logging into the Web-based survey.** Once you’ve gathered the information requested below, it should be easier to complete the survey more efficiently.

Note: These are not the only questions in the survey. Rather, these are the questions that may require respondents to research or contact other individuals to collect the information necessary to answer the questions.

Project LAUNCH School Survey Initial Email

Dear {School administrator/ECE director},

Thank you for agreeing to participate in the **multi-site evaluation of Project LAUNCH (Linking Actions for Unmet Needs in Children's Health)**. Below you will find information describing the study and a link to the survey.

As part of this evaluation of Project LAUNCH, we are asking you to complete a **web-based survey** that asks questions related to child suspension and expulsion from preschool and elementary school. We estimate that it will take 20 minutes to complete the survey and up to 40 minutes to collect information to inform your responses.

Project LAUNCH is a federally-sponsored program that **promotes the wellness of young children from birth to 8 years** by addressing the physical, social, emotional, cognitive and behavioral aspects of their development. Project LAUNCH is designed to have a community-wide impact by enhancing the way early childhood systems work together, integrating child behavioral health services with other health services, and implementing evidence-based interventions geared toward the social and emotional well-being of children and families. For the evaluation, we are studying communities across the country to help us learn more about services for children and families as well as child and family outcomes. This study is being conducted by a non-profit research organization, **NORC at the University of Chicago**, under contract with the **Substance Abuse and Mental Health Services Administration (SAMHSA)** and the **Administration for Children and Families (ACF)** at the U.S. Department of Health and Human Services (HHS).
