

Project LAUNCH Direct Services Survey

We are conducting a study to learn about the social and emotional development of children from birth through eight years of age. This study is funded by the Substance Abuse and Mental Health Services Administration (SAMHSA), an agency within the U.S. Department of Health and Human Services (HHS). By collecting information from Project LAUNCH grantees, we seek to gain a better understanding of direct services that are being provided through the grant to further child health and well-being in LAUNCH communities. We estimate this survey will take approximately 8.5 hours to complete, including the time it may take to gather the information needed to respond to the questions. Your participation in the survey is voluntary, and your responses will be kept private to the extent permitted by law. As described in the (XXXX grantee number entered here) cooperative agreement award this data collection must be completed by the grantee.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB number for this information collection is 0970-0373 and the expiration date is XX/XX/XXXX.
