Title of Collection: Quick Response Information System (QRIS) 2017–2020 System Clearance.

OMB Control Number: 1850–0733.

Type of Review: An extension of an existing information collection.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 104,004.

Total Estimated Number of Annual Burden Hours: 31,704.

Abstract: The National Center for Education Statistics (NCES) Quick Response Information System (QRIS) consists of the Fast Response Survey System (FRSS) and the Postsecondary Education Quick Information System (PEQIS). The QRIS currently conducts surveys under OMB generic clearance 1850–0733, which expires in February 2018. This submission requests approval to continue the current clearance conditions through the end of 2020. FRSS primarily conducts surveys of the elementary/secondary sector (districts, schools) and public libraries. PEQIS conducts surveys of the postsecondary education sector. FRSS and PEQIS surveys are cleared under the QRIS generic clearance. The QRIS clearance is subject to the regular clearance process at OMB with a 60-day notice and a 30-day notice as part of the 120-day review period. Each individual FRSS or PEQIS survey is then subject to clearance process with an abbreviated clearance package, justifying the particular content of the survey, describing the sample design, the timeline for the survey activities, and the questionnaire. The review period for each individual survey is 45 days, including a 30-day **Federal Register** notice period. OMB will provide comments as soon after the end of the 30-day notice period as possible. This generic clearance request is for surveys of state education agencies, school districts, schools, postsecondary institutions, and libraries.

Title of Collection: Study of Higher Education Articulation Agreements Covering the Early Care and Education Workforce.

OMB Control Number: 1875–NEW.

Type of Review: A new information collection.

Respondents/Affected Public:

Individuals or Households.

Total Estimated Number of Annual Responses: 47.

Total Estimated Number of Annual Burden Hours: 104.

Abstract: The purpose of this study is to identify elements that states have in place to enable successful articulation as early care and education (ECE) workers progress from an associate's degree to a bachelor's degree and describe states' successes and challenges in implementing the elements. Specifically, the study will use telephone interviews, focus groups, and review of extant documents to examine ECE articulation policies and their implementation in six focal states that have statewide articulation policies addressing degrees or coursework in early childhood education.

This analysis will rely on three types of data sources:

- Telephone interviews. One-on-one phone interviews will be conducted with 76 individuals including: Faculty and college administrators from states' two-year and four-year institutions of higher education; state higher education administrators; representatives from higher education governing bodies and ECE licensure bodies; and other individuals who are knowledgeable about development, implementation, and monitoring of ECE articulation policies and the ECE workforce.
- Focus groups. Virtual focus groups will be held in each of the six states, including student focus groups (with 24 students total) and focus groups of institutional support staff (with 20 staff total).
- Review of extant documents. These documents will include articulation policies, legislation, and governing body meeting notes.

[Project No. 2744–043]

North East Wisconsin Hydro, LLC; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission (Commission or FERC) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed the application for a new license for the 4.348-megawatt Menominee and Park Mill Hydroelectric Project (FERC Project No. 2744–043) and has prepared a single environmental assessment (EA). The project consists of two developments (Menominee and Park Mill) located on the Menominee River in Menominee County, Michigan, and Marinette County, Wisconsin.

In the EA, Commission staff analyzes the potential environmental effects of relicensing the project and concludes that issuing a new license for the project, with appropriate environmental measures, would not constitute a major federal action significantly affecting the quality of the human environment.

A copy of the EA is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at www.ferc.gov using the eLibrary link.
