APPENDIX VI-17
REPORTING AND FEEDBACK SYSTEM (RFS) HMBS ISSUER MONTHLY REPORT OF POOL, LOAN AND PARTICIPATION DATA

Public reporting burden for this collection of information is estimated to average 8 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Ginnie Mae may not collect this information, and you are not required to complete this form, unless it displays a currently valid OMB control number.

The information is required by Sec. 306(g) of the National Housing Act or by Ginnie Mae Handbook 5500.3, Rev. 1. The information provides specific deal information and serves to educate investors. The information collected will not be disclosed outside the Department except as required by law.

Applicability: Ginnie Mae II HMBS Program only.

Purpose: To provide Ginnie Mae with information concerning HMBS pool, loan level and participation level activity. Pool, loan and participation level data must be submitted electronically to Ginnie Mae's Reporting and Feedback System (RFS), HMBS Reporting and Administration (HRA) module. These files are to be transmitted monthly to Ginnie Mae.

Prepared by: Issuer.

Prepared in: Electronic form. Submitted via the Ginnie Mae Enterprise Portal and via secure FTP.

Due Date: Data is due by 7:00 pm (Eastern Time) on the 2nd business day of the month. Correction of critical RFS exceptions that are designated as Errors ("E") and Critical ("C") related to the HMBS pool, loan, and participation records must be made no later than 7:00 pm (Eastern Time) on the 4th business day. RFS exceptions that are designated Matching ("M") and Low ("L") should be corrected by no later than 7:00 pm (Eastern Time) on the 10th business day of each month.

1 Monthly Reporting Pool Accounting and Loan-Level Requirements

The Issuer will report Pool and Loan-Level accounting data to the Ginnie Mae Data Collection Agent on a monthly basis. The reporting approach in general follows the current Ginnie Mae II reporting on the pool of loans and security.

The Issuer will report the following monthly reporting <u>data in separate submission files</u>:

- <u>Pool/Security Accounting Records</u> — accounting data about the pool that will include Collateral Information and reporting about the HMBS security.

- <u>Participation Accounting Records</u> — accounting data about each Participation, including interest accruals and payment amounts.

- <u>HECM Loan Data Accounting Records</u> — accounting data about the securitized portion of the HECM loan, the un-securitized portion of the HECM loan, and the HECM loan as a whole.

File Naming Conventions

 The file naming convention is:
xiiiimmyyss.dat where:
- "x" is a constant that describes the type of records contained in the file; "S" = Pool/Security Accounting records; "L" = HECM Loan Accounting records; "P" = Participation Accounting records.
- "iiii" is the Issuer Number
- "mmyy" is the month and year (last 2 digits) of the reporting period
- "ss" is a file sequence number; the default value is 01; if needed this number should be incremented by one for every subsequent file of the same record type (i.e. "S"/"L"/"P") submitted during the same reporting period.

    For example, if an Issuer submits three "S" files during a given reporting period the valid file names would be Siiiimmyy01.dat, Siiiimmyy02.dat, and Siiiimmyy03.dat .

For each submission file received, a functional acknowledgement file is produced to provide the Issuer feedback on the status of the submission file. The functional acknowledgement file naming convention is:
- fayyyymmss.9999 where:
    - o   fa is constant;
    - o   yyyymm is the reporting period;
    - o   ss is the file sequence number; and
    - o   9999 is the Issuer ID.

<u>Each submission file must have a header record, trailer record,</u> and some number of individual records depending on the Issuer data associated with that particular file type. Typically, each of the submission files would have a header, all of the individual records as applicable for the reporting period, and a trailer record.

Each upload file layout is followed by the definitions of each field in the record layout.

Notes regarding field level reporting instructions:

1. For numeric fields (designated as 9's), report numeric values as right justified.

2. Some fields allow signed (negative or positive) amounts. In such fields if reporting a negative amount, place the explicit negative sign to the left of the left most significant digit. Do not report positive signs.

HMBS Exception Severity Level Definitions

The table below explains the severity levels and correction timeframes for resolving monthly reporting exceptions in the HRA Module of RFS.

Severity Level	Correction Timeframe	Severity Description
E	Corrections to Pool, Loan and Participation Records as applicable; corrections on these exceptions are due no later than the 4th business day.	Record cannot be processed – Exceptions must be addressed in order to complete monthly reporting; resubmit data as applicable to the particular HMBS message. Exceptions can occur on any Pool, Loan, or Participation record.
C	Corrections must be addressed by the 4th business day. The severity level, "C", is associated with Pool, Loan and Participation reporting.	Generally, these are exceptions related to remittance and/or disclosure data.
M	Corrections should be addressed by the 10th business day.	Loan Matching; corrections may require research, and therefore corrections could be made in the following reporting period.
L	Corrections should be addressed by the 10th business day.	Exceptions can occur on any reporting of Pool, Loan, or Participation records.

HMBS Record Layout Formats

Each file layout is followed by the definitions of each field in the record layout. The definitions are numbered to correspond to the file layout. The definitions are followed by Exception Messages that may occur if business rules are not observed. 2   SECURITY

Ginnie Mae anticipates that services will be offered to transmit or receive data in a secure environment. At this time, the following general standards apply:

*   sFTP — Secure FTP via approved secure FTP products
*   Ginnie Mae Enterprise Portal

Ginnie Mae has defined a sensitive data section of the HECM Loan Data record:

Sensitive Data — Due to privacy concerns of sensitive/personal data, Issuers requested that sensitive reporting data be reported as infrequently as possible. To address this concern, sensitive data will be reported once at origination via the HECM Loan Issuance Record (11706). If any change occurs to a value in one of these fields, it will be reported as a change within the Sensitive Data section of the HECM Loan Data Accounting Record Type. Any changes to Sensitive Data will be recognized and handled appropriately.
